Organisation

The Kerry College Placement Office coordinates student work placements across academic programmes, managing the overall placement including opportunities, applications, decisions, agreements, supervisor allocations, and progress reviews *(P1S1, P1S2)*. Currently, placement records and operational communications are fragmented across separate files, email threads, informal notes, messages, and spreadsheets *(P1S2, P4S1)*. Requests also arrive through multiple channels and may be incomplete when received by staff *(P2S3)*.

Present Processes

Ref	Evidence from the scenario	What the evidence tells you
P1S2	Opportunities, applications, decisions, agreements, supervisor allocation and progress reviews are recorded in separate files and email threads.	Placement information is spread across several records and channels, with no single place showing a placement's full position.
P2S1	Students express preferences and provide evidence required by their programme.	Requests begin with the student, who supplies both their placement preferences and supporting evidence. Assuming each programme sets its own evidence requirements, what a complete request looks like may differ between students *(A5)*.
P2S2	An opportunity may be advertised while dates, duties or approval remain provisional	Advertised opportunities are not always final, meaning dates, duties or approval may still change after students have expressed interest or applied.
P2S3	Requests arrive through several channels and may be incomplete.	Requests come in through multiple channels rather than a single route, and they are not always complete when staff receive them.
P2S5	Priorities and exceptions are not applied consistently.	Decisions are not made consistently, meaning students in similar situations may have their applications treated differently, possibly because there are no clear guidelines.
P2S6	Another person or organisation may assist with a request.	Requests are not always handled by the student alone. Staff may sometimes be dealing with third parties acting on behalf of the student.
P2S7	Staff are uncertain what authority is required before detailed information or decisions can be shared.	Staff have no clear basis for deciding who can receive detailed information or decisions, particularly when a third party is involved. This may mean each case is handled differently, possibly due to the absence of specified guidelines.
P3S1	Matching considers programme outcomes, student interests, employer requirements, location, capacity and potential conflicts.	A single match has to satisfy academic, student, employer, and practical conditions at the same time so matching is more complex than pairing a student with an open vacancy.
P3S2	Employer selection and academic approval are separate decisions.	A placement depends on the agreement from two separate parties: the employer selects the student, and the college approves the placement.
P3S3	Capacity depends on a combination of people, places, resources, and timing.	Capacity is not only a count of available places, but several conditions which must be in place for a placement to proceed.
P3S4	A visible vacancy does not necessarily mean that every requirement is satisfied.	An open place does not confirm that a placement can proceed, as other requirements may still be unmet.
P3S5	Provisional allocations sometimes remain in place while essential information is still missing.	Some allocations are held without being confirmed or released, and these can decrease the amount of places that may be needed by other students.

Ref	Evidence from the scenario	What the evidence tells you
P3S6	Changes can affect several linked arrangements.	Placement arrangements are connected, so a change to one may have a knock on effect on others.
P4S1	Staff record progress, decisions and outstanding actions using notes, messages, and spreadsheets.	Progress is tracked in informal, separate records, rather than a singular shared record.
P4S2	Different teams use status terms differently, making it difficult to identify what is awaiting action and who is responsible.	Teams do not share a common meaning for each status, so next steps and ownership are often unclear.
P4S3	A planned activity may be changed, partially completed, paused, or withdrawn.	Activities do not always proceed as planned, so an activity may be in several states other than completed or not started.
P4S5	Reviews may generate new actions, revised arrangements, and escalation.	A review is not always the end. It may lead to further work, changed arrangements, or escalation.
P5S4	Connectivity may be unreliable during off-site work.	Some work takes place off-site, where staff may not always have a reliable connection.
P6S3	Administrator: Provisional arrangements can block capacity long after the original request has stalled.	Some allocations are held without being confirmed or released, and these can decrease the amount of places that may be needed by other students.

Problems & Consequences

PR ID	Ref	Observation or Symptom	Underlying Problem	Likely Consequence
PR1	P1S2, P4S1	Placement information and progress are recorded in separate files, email threads, notes, and spreadsheets.	No single shared record of a placement.	Duplicated or conflicting information, time consuming searching across records.
PR2	P2S3 (P2S1)	Requests arrive through several channels and may be incomplete.	No single intake route.	Requests may be delayed or lost, and students may miss opportunities.
PR3	P2S5	Priorities and exceptions are applied inconsistently	There are no agreed, documented rules for prioritising and granting exceptions.	Students in similar situations are treated differently, leading to potential complaints, appeals, and reputational risk.
PR4	P2S7 (P2S6)	Staff are unsure what authority is needed before sharing information or decisions.	There are no defined authorisation rules, especially for third parties acting on behalf of the student.	Information may be disclosed without proper authority, or a legitimate party may be refused, causing a delay.
PR5	P3S5, P6S3	Provisional allocations stay in place while essential information is missing, long after the request stalls.	Provisional allocations have no time limit, review or release rule.	Capacity may be blocked, meaning other students may miss places and the available supply may be overstated.
PR6	P2S2, P3S4	Opportunities are advertised, while still provisional and a visible vacancy does not mean all requirements are met.	The system does not distinguish advertised, confirmed and proceeding opportunities, or track the outstanding requirements.	Students may apply or are matched to placements that change or cannot go ahead, so the effort is wasted and rematching is needed.
PR7	P4S2 (P4S3)	Teams use status terms differently, so it's unclear what's awaiting action and who owns it.	There are no shared status definitions or assigned ownership, and no states for paused, partial, or withdrawn work.	Actions may be missed, delays may go unnoticed, and accountability may be unclear.

PR ID	Ref	Observation or Symptom	Underlying Problem	Likely Consequence
PR8	P3S6	Changes to one arrangement affect other linked arrangements.	Dependencies between arrangements are not recorded.	Knock-on effects may be missed, causing clashes or broken arrangements.
PR9	P5S4	Connectivity is unreliable off-site.	Staff cannot record or access information offline.	Updates may be delayed or lost, and data may need to be re-entered later.
PR10	P3S2, P1S2	Employer selection and academic approval are separate decisions, recorded in separate files and email threads.	There is no single place showing both decisions together, or whether a placement is able to proceed.	A placement may proceed with only one decision, or be delayed while staff check whether both decisions have been made.

Business Problem Statement

Kerry College Placement Office currently manages student placement opportunities, applications, decisions, agreements, supervisor allocations, and progress reviews across separate files, email threads, notes, messages, and spreadsheets **(P1S2, P4S1)**. Due to placement information being spread across several records with no single shared record showing a placement's full position **(P1S2, P4S1)**, records may become duplicated or conflicting, and staff may waste time searching across records.

Placement requests arrive through multiple channels rather than a single route and are not always complete when received **(P2S3)**. This may cause processing delays or result in requests being lost. This means that students could miss out on opportunities. Furthermore, decisions on priorities and exceptions are not made consistently **(P2S5)**, which means students in similar situations may have their applications treated differently. When third parties assist with a request **(P2S6)**, staff have no clear basis for deciding who can receive detailed information or decisions **(P2S7)**. This creates risks of improper data sharing or delaying legitimate helpers.

Matching and capacity management are affected by provisional information. Advertised opportunities are not always final **(P2S2)**, so a visible vacancy does not confirm that a placement can proceed **(P3S4)**. Additionally, provisional allocations are sometimes held without being confirmed or released **(P3S5)**. As the administrator notes, these provisional arrangements can block capacity long after an original request has stalled **(P6S3)**, which can reduce the number of places available to other students **(P3S5)**. As placement arrangements are connected, a change to one may have a domino effect on others **(P3S6)** and could potentially disrupt other planned placements.

Teams also do not share a common meaning for each status, making next steps and ownership unclear **(P4S2)**. This may lead to outstanding actions being missed or delayed. Off-site staff may also lack a reliable connection **(P5S4)**, which can delay record updates and require details to be re-entered later.

These issues increase operational difficulties, placing an extra burden on staff, causing unnecessary delays in processing, creating uncertainty around capacity, and risking an inconsistent experience for students seeking placements.

Desired Outcomes

Based on stakeholder requirements, the desired outcomes for the placement focus on operational clarity, equality, and record integrity:

- **Outcome-Based Matching:** Placement vacancies are recognised as valid matches only when all academic, employer, student, and practical requirements are satisfied (P6S1).
- **Transparent Status Tracking:** Service users can clearly determine the current status of their request and know precisely what information or action is pending (P6S2).
- **Capacity Release:** Incomplete or stalled provisional arrangements are reviewed or released after defined thresholds (Q4) to prevent capacity from being blocked indefinitely (P6S3).
- **Role-Appropriate Information Sharing:** External partners receive only the placement information necessary for their specific role (P6S4).
- **Auditability and Decision Traceability:** New review information and progress notes can be added continuously without overwriting or erasing the historical basis of earlier decisions (P6S5).
- **Consistent Status and Outcome Reporting:** Delays, withdrawals, and incomplete outcomes are recorded using agreed, consistent categories across all teams (P6S6).

Known Evidence and Uncertainty

The scenario confirms the existence of fragmented tracking, multi-channel intake, and inconsistent status usage across teams (P1S2, P2S3, P4S2, P4S1). However, several operations remain unconfirmed and are managed under working assumptions or open issues:

Programme Evidence Requirements (Q1, A5): The exact evidence items required before a request is deemed ready for decision are assumed to vary by programme (A5) and require stakeholder confirmation.

Priority and Exception Rules (Q2): Explicit criteria for ranking priority applications or granting exception waivers are not yet formally documented.

Third-Party Authorisation (Q3, A8): The verification required before sharing placement details with third parties acting on behalf of a student remain to be defined by the data-protection role (A8, SH11).

Operational Rules and Parameters: Further open questions regarding capacity release thresholds, supervisor definitions, and matching mechanics are tracked under Q4 through Q10.

Concise Purpose

The proposed Student Work Placement Coordination Service will support placement staff, students, employers, coordinators, and administrators, while protecting the interests of third-party representatives and managers, in coordinating placement opportunities, applications, decisions, agreements, supervisor allocations, and progress reviews.

The service will provide a single, shared record showing a placement's full status **(PR1)**, and make request completeness and submission progress clearly visible across all incoming channels **(PR2)**. It will support the consistent application of agreed placement rules **(PR3)** and provide a clear framework for authorisation, reducing the risk of improper data sharing and helping prevent unnecessary delays for legitimate third-party helpers **(PR4)**.

To improve capacity and allocation management, the service will provide visibility over provisional opportunities and allocations, helping to prevent stalled requests from blocking capacity **(PR5, PR6)**, and minimising knock-on impacts across linked arrangements by making the links between arrangements visible, so the effect of a change can be seen prior to being made **(PR8)**.

The service will apply standardised status definitions across teams, helping ensure that actions and task ownership are clearly defined **(PR7)**. The service will also allow off-site staff to record updates when connectivity is unreliable **(PR9)**.

In-Scope and Out-Of-Scope Functions

ID	In Scope for the Initial Release	Ref	ID	Out of Scope for the Initial Release	Ref
IS1	Placement Record Management	PR1	**OS1**	Specialist Professional Systems	P5S6
IS2	Request Tracking	PR2	**OS2**	Financial Accounting	P5S6
IS3	Priority Management	PR3	**OS3**	Public Website Functions	P5S6
IS4	Authorisation Management	PR4	**OS4**	Negotiating Employer Legal Contracts	A1
IS5	Approval Decision Tracking	PR10	**OS5**	External Recruitment System Integration	A2
IS6	Capacity and Provisional Allocation Management	PR5, PR6	**OS6**	Student Academic Record Maintenance	A3
IS7	Linked Arrangements Tracking	PR8			
IS8	Status and Ownership Tracking	PR7			
IS9	Off-Site Progress Recording	PR9			

Dependencies

Dependencies in this context refer to external factors, decisions, or systems outside the services direct control that the `Student Work Placement Coordination Service` relies upon to function correctly.

Dependency (outside the service)	Needed for	Ref
Academic record systems supply programme and enrolment information, including each programme's evidence requirements.	FR01, BR01	A3, A5, OS6
The data protection role sets clear guidelines on third party verification standards and information sharing rules.	FR05, BR03, NFR02	A8, SH11, Q3, Q7
Employers review student applications and record selection decisions.	FR06, BR05	SH4, P3S2

Assumptions

ID	Ref	Category	Statement
A1	OS4	Assumption	Employer legal contracts are negotiated outside of the system. Only the resulting placement agreements are recorded.
A2	OS5	Assumption	The initial release can operate without integration with external recruitment systems.
A3	OS6	Assumption	Student academic records continue to be maintained in existing academic systems, with the service only holding placement-related information.
A4	SH8	Assumption	Placement funders do not need to receive unnecessary personal or commercially sensitive information.
A5	P2S1	Assumption	Each programme sets its own evidence requirements, so what counts as a complete request may differ between students.
A6	P6S2	Assumption	The service user is a student.
A7	P6S4	Assumption	The partner representative is an external partner.
A8	P2S7, P5S2, P5S3	Assumption	The college has a data-protection role responsible for decisions on what placement information may be shared, and with whom.
A9	P1S2	Assumption	Each placement has an allocated supervisor whose allocation is recorded and managed by placement staff.

Constraints

ID	Ref	Category	Statement
CS1	P5S5, IS1-IS9	Constraint	The initial release is limited to service coordination and records.
CS2	P5S4	Constraint	The service must accommodate off-site staff operations where connectivity may be unrelaible.
CS3	P5S2, P5S3	Constraint	External partners and funders must access only placement information relevant to their role, excluding unnecessary personal or commercially sensitive details.
CS4	P1S2, P4S1	Constraint	The service starts from records currently held in separate files.

SH12	P1S2, P3S3, P3S6, A9	**Supervisor**	Know which placements they are allocated to and be informed when an allocation changes.	Being allocated to clashing placements, or changes to linked arrangements altering their allocation without notice.	Medium	No direct use of the service, allocated to placements by placement staff.	Indirect

> [!NOTE] Expected interactions record how each stakeholder was initially expected to engage with the placement process. Following the actor analysis in Session 4, the Third-Party Representative, External Partners, Management, Funders and Reviewer were designated offstage stakeholders for the initial release. See the Actor Decisions for the reasoning.

Actor or Stakeholder Catalogue

Actor or Stakeholder	Type	Goal or Interest	Direct Interaction
Student	Primary Actor	Submit placement preferences and programme evidence, and view the current status of their placement request.	Yes
Placement Staff	Primary Actor	View the shared placement record, apply priority rules, verify third-party permissions, record academic approval decisions, set activity status, and record progress updates off-site.	Yes
Employer	Primary Actor	Record selection decisions for student applications.	Yes
Placement Coordinator	Primary Actor	View provisional placement opportunities and the dependencies between connected arrangements.	Yes
Administrator	Primary Actor	Release stalled provisional allocations to free capacity for other students.	Yes
Third-Party Representative	Offstage Stakeholder	Ensure legitimate helpers are not refused or delayed when acting for a student.	No
External Partners	Offstage Stakeholder	Ensure partners receive only the information required for their role.	No
Management	Offstage Stakeholder	Ensure reliable summary information on placement activity is available.	No
Funders	Offstage Stakeholder	Ensure summary reporting does not expose unnecessary personal or commercially sensitive information.	No
Reviewer	Offstage Stakeholder	Ensure the basis of earlier decisions is preserved when new information is added.	No
Data-Protection Officer *(A8)*	Offstage Stakeholder	Ensure placement information is shared only with authorised parties and only as much as their role requires	No
Supervisor *(A9)*	Offstage Stakeholder	Ensure supervisor allocations are recorded accurately and that changes affecting them are visible	No

Actor Decisions

Student and Service User

An assumption was made that the service user is a student *(A6)*. A quote from the service user (*"I need to know whether I am waiting for information, a decision, or an outside organisation"*) *(P6S2)* suggests an individual whose own placement request is in progress, which describes the student. Therefore, a single Student actor will cover both terms.

Placement Staff, Coordinator, Administrator

Placement staff, coordinators, and administrators all work within the placement office, but have different goals. The staff process records *(P4S1)*, the coordinator oversees provisional opportunities and dependencies *(P5S1, P3S6)*, and the administrator releases stalled allocations *(P6S3)*. They are therefore kept as separate actors, each with its own goals and use cases matching the user stories.

Third-Party Representative

Placement staff verify permissions and the third party contacts staff not the service *(US05, FR05)*. Therefore, third-party representatives are designated as offstage stakeholders. Their interest in not being wrongly refused or delayed, and in student information not being disclosed without authority is still protected *(BR03, NFR02)*.

Management and Funders

Summary reporting for management and funders is a recognised need *(P5S3)*, with Manager stating: "We need consistent reasons for delay, withdrawal and incomplete outcomes." *(P6S6)*. Reporting was not prioritised within the functional requirements for the initial release, so no user story has either party using the service directly.

Therefore, both the management and funders are designated as offstage stakeholders. Their interest in reliable reporting is still protected through *(NFR01, CS3, P6S6, FR10)*.

External Partners

External partners should receive only the information required for their role *(P5S2)*, with the partner representative stating: "I need the information required for my role, not the complete case history." *(P6S4)*.

The partner representative is assumed to be an external partner *(A7)*. As no user story in the initial release has external partners using the service directly, they are designated offstage stakeholders. Their interest in receiving role-relevant information is still protected through *(NFR01)* and *(CS3)*

Reviewer

The reviewer's concern is that: "New information should be added without erasing the basis of earlier decision." *(P6S5)*. However, no user story in the initial release has the reviewer using the service directly. Therefore, the reviewer is designated as an offstage stakeholder.

Their interest in preserving earlier decisions is still protected through *(BR06)* and *(NFR04)*, which apply to every update made by placement staff.

Data-Protection Officer

The scenario does not name a data-protection role, but raises several concerns about who may receive information and how much *(P2S7, P5S2, P5S3)*, which no listed stakeholder is responsible for.

A data-protection officer is therefore assumed to exist *(A8)*, who will set or approve the rules on information sharing rather than using the service themselves. Therefore, they will be designated as an offstage stakeholder.

Their interest is protected through *(NFR01, NFR02, BR03, CS3)*, with the question of what information can be shared and to who *(Q7)* directed to them.

Supervisor

The scenario mentions supervisor allocation as part of each placement *(P1S2)*, and capacity depends on the people involved *(P3S3)*. Supervisors are assumed to be allocated to placements by placement staff *(A9)*.

No user story in the initial release has them using the service directly. Therefore, they are designated as offstage stakeholders. Whether or not a supervisor is a college staff member or an employer contact is unresolved *(Q8)*, and will impact the domain model.

REQUIREMENTS CATALOGUE

- REQUIREMENTS CATALOGUE
- Prioritisation Rationale
- Functional Requirements
- Non-Functional Requirements

Prioritisation Rationale

The requirements allocation reflects the operational needs of the Student Work Placement Coordination Service run by the Kerry College Placement Office. The high proportion of *Must* requirements (nine of twelve functional requirements and all four non-functional requirements) is driven directly by the core problems found during analysis. Without:

- A single shared record (PR1, driving FR03),
- Controlled student intake (*PR2, driving FR01 and FR02)*,
- Dual academic and employer decision tracking *(PR10, driving FR06 and FR07)*,
- Strict permission checks to prevent improper disclosure *(PR4, driving FR05 and NFR01/NFR02)*,
- Capacity release *(PR5, driving FR08)*,
- Clear status and ownership *(PR7, driving FR10)*,
- Reliable off-site progress updates *(PR9 and CS2, driving FR12 and NFR03)*,
- Preserved decision history *(BR06, driving NFR04)*,

the service cannot function properly.

FR04 (priority rules) and *FR11* (dependency display) are classed as Should. *FR04* is classed as Should because the specific priority criteria have not yet been agreed *(Q2)*, meaning the requirement cannot be fully specified for this release.

FR11 is also classed as Should because what actually links placement arrangements together remains an unresolved question *(US11 Q1)*. *FR09* (viewing provisional placement opportunities) is classed as Could because staff can manage provisional numbers without a dedicated view.

Functional Requirements

ID	Functional Requirement	MoSCoW	Source / Rationale	Problem	Verification
FR01	The system shall allow a student to submit placement preferences and programme evidence.	Must	Student (SH1), IS2	PR2	Gherkin scenarios SC01–SC05
FR02	The system shall allow a student to view the current status of their placement request.	Must	Student (SH1), IS2	PR2, PR7	Acceptance testing of US02 AC1–AC6
FR03	The system shall maintain a single shared record for each placement.	Must	Placement Staff (SH2), IS1	PR1	Demonstration of single placement record across all status transitions
FR04	The system shall allow placement staff to apply agreed priority rules for student placement applications.	Should	Placement Staff (SH2), IS3	PR3	Acceptance testing of rule application once priority criteria are agreed (Q2)
FR05	The system shall allow placement staff to verify third-party authorisation permissions before disclosing placement information.	Must	Placement Staff (SH2), Third-Party Representative (SH3), IS4	PR4	Inspection of permissions records before disclosure
FR06	The system shall allow employers to record selection decisions for student applicants.	Must	Employer (SH4), IS5	PR10	Acceptance testing of employer selection decision recording
FR07	The system shall allow placement staff to record college academic approval decisions for placements.	Must	Placement Staff (SH2), IS5	PR10	Acceptance testing of college approval decision recording
FR08	The system shall allow the administrator to release stalled provisional allocations.	Must	Administrator (SH9), IS6	PR5	Acceptance testing of capacity release upon reaching threshold (Q4)
FR09	The system shall allow the placement coordinator to view provisional	Could	Placement Coordinator (SH5), IS6	PR6	Demonstration that provisional opportunities are identified

ID	Functional Requirement	MoSCoW	Source / Rationale	Problem	Verification
	placement opportunities.				separately from confirmed ones
FR10	The system shall allow placement staff to set an activity status from the agreed set of standardised values.	Must	Placement Staff (SH2), IS8	PR7	Inspection of status selection against the agreed status vocabulary
FR11	The system shall display dependencies between connected placement arrangements.	Should	Employer (SH4), Placement Coordinator (SH5), IS7	PR8	Demonstration that linked arrangements are shown before a change is made
FR12	The system shall allow off-site staff to record progress updates when connectivity is unreliable.	Must	Placement Staff (SH2), IS9	PR9	Acceptance test: updates recorded off-site appear in the shared record once connectivity returns

Non-Functional Requirements

ID	Ref	Quality Category	MoSCoW	Measurable Requirement	Source / Rationale	Verification
NFR01	P5S2, P5S3	Privacy	Must	The system shall ensure that external partners and funders can access only placement data permitted by their role, with no restricted details visible.	Protects sensitive information.	Access test per role: 0 restricted fields visible to partner and funder roles
NFR02	P2S7	Security	Must	The system shall prevent student data from being disclosed to a third party unless the required authorisation permissions are recorded, with every access attempt without the required permissions refused.	Prevents wrongful disclosure.	Test that every disclosure attempt without recorded permission is refused
NFR03	P5S4	Reliability	Must	The system shall ensure that 100% of updates recorded by off-site staff without a reliable connection reach the shared record once the connection returns, with no lost updates.	Prevents lost or re-entered updates.	Test that all off-site updates reach the shared record after reconnection, with none lost
NFR04	P6S5	Integrity	Must	The system shall preserve the history and basis of earlier decisions so that none can be overwritten when new information is added.	Preserves the record of earlier decisions.	Inspection that each revised decision retains the earlier decision and its basis.

RULES AND UNCERTAINTY REGISTER

FOR THE FULL WORKINGS OF THIS SECTION, PLEASE SEE `01_Stakeholders_And_Requirements/`

- RULES AND UNCERTAINTY REGISTER
- Business Rules
- Assumptions
- Constraints
- Risks
- Clarification Questions

Business Rules

ID	Ref	Category	Statement
BR01	P2S1, P2S4	Rule	A request must include the evidence required by the student's programme before it is ready for a decision. *(Q1)*
BR02	P2S5	Rule	Priority and exception handling for applications must follow agreed, documented guidelines rather than inconsistent practice. *(Q2)*
BR03	P2S7	Rule	Staff must verify and record third-party permissions prior to the disclosure of any detailed student placement information or decisions. *(Q3)*
BR04	P3S1, P3S4, P6S1	Rule	A vacancy must not be treated as a match unless programme outcomes, student interests, employer requirements, location, capacity, and potential conflicts have all been satisfied.
BR05	P3S2	Rule	A placement cannot proceed unless both employer selection and academic approval are recorded.
BR06	P3S7, P4S6, P6S5	Rule	Staff must preserve the current confirmed position, while retaining evidence of earlier decision making.
BR07	P4S4	Rule	A formal decision must be distinguished from an operational change, with silence not taken as approval.
BR08	P3S5, P6S3, FR08	Rule	Provisional allocations that remain stalled past the agreed threshold must be reviewed and released. *(Q4)*

Assumptions

ID	Ref	Category	Statement
A1	OS4	Assumption	Employer legal contracts are negotiated outside of the system. Only the resulting placement agreements are recorded.
A2	OS5	Assumption	The initial release can operate without integration with external recruitment systems.
A3	OS6	Assumption	Student academic records continue to be maintained in existing academic systems, with the service only holding placement-related information.
A4	SH8	Assumption	Placement funders do not need to receive unnecessary personal or commercially sensitive information.
A5	P2S1	Assumption	Each programme sets its own evidence requirements, so what counts as a complete request may differ between students.
A6	P6S2	Assumption	The service user is a student.
A7	P6S4	Assumption	The partner representative is an external partner.
A8	P2S7, P5S2, P5S3	Assumption	The college has a data-protection role responsible for decisions on what placement information may be shared, and with whom.
A9	P1S2	Assumption	Each placement has an allocated supervisor whose allocation is recorded and managed by placement staff.

Constraints

ID	Ref	Category	Statement
CS1	P5S5, IS1-IS9	Constraint	The initial release is limited to service coordination and records.
CS2	P5S4	Constraint	The service must accommodate off-site staff operations where connectivity may be unrelaible.
CS3	P5S2, P5S3	Constraint	External partners and funders must access only placement information relevant to their role, excluding unnecessary personal or commercially sensitive details.

ID	Ref	Category	Statement
CS4	P1S2, P4S1	Constraint	The service starts from records currently held in separate files.

Risks

ID	Ref	Category	Statement
RS1	P1S2, P4S1	Risk	Historical placement records may conflict or be incomplete when moved into the new single shared record.
RS2	P2S5, P2S7	Risk	Staff may continue handling cases inconsistently without agreed priority criteria and third-party authorisation rules.
RS3	P4S2	Risk	Task ownership may remain unclear without adopting standardised status definitions.
RS4	P5S4	Risk	If connectivity fails during off-site work, progress updates recorded may not reach the shared record.

Clarification Questions

```
Q1. What information is required before a request is ready for decision?

Q2. How should eligibility, priority and exceptions should be applied?

Q3. What authority is required when another person acts for the requester?

Q4. When should provisional allocations should expire or become confirmed?

Q5. Who may approve changes, substitutions or withdrawal?

Q6. How should versions, reviews and outstanding actions should be related?

Q7. Which information may be shared with staff, partners and funders?

Q8. Is a placement supervisor a college staff member, an employer contact, or can it be either?

Q9. Does "approval" of an advertised opportunity mean the same as academic approval of a placement, or
is it a separate approval?

Q10. Should a match be recorded as its own outcome, or is it the point at which a request satisfies
all the important requirements?
```

USE CASE MODEL

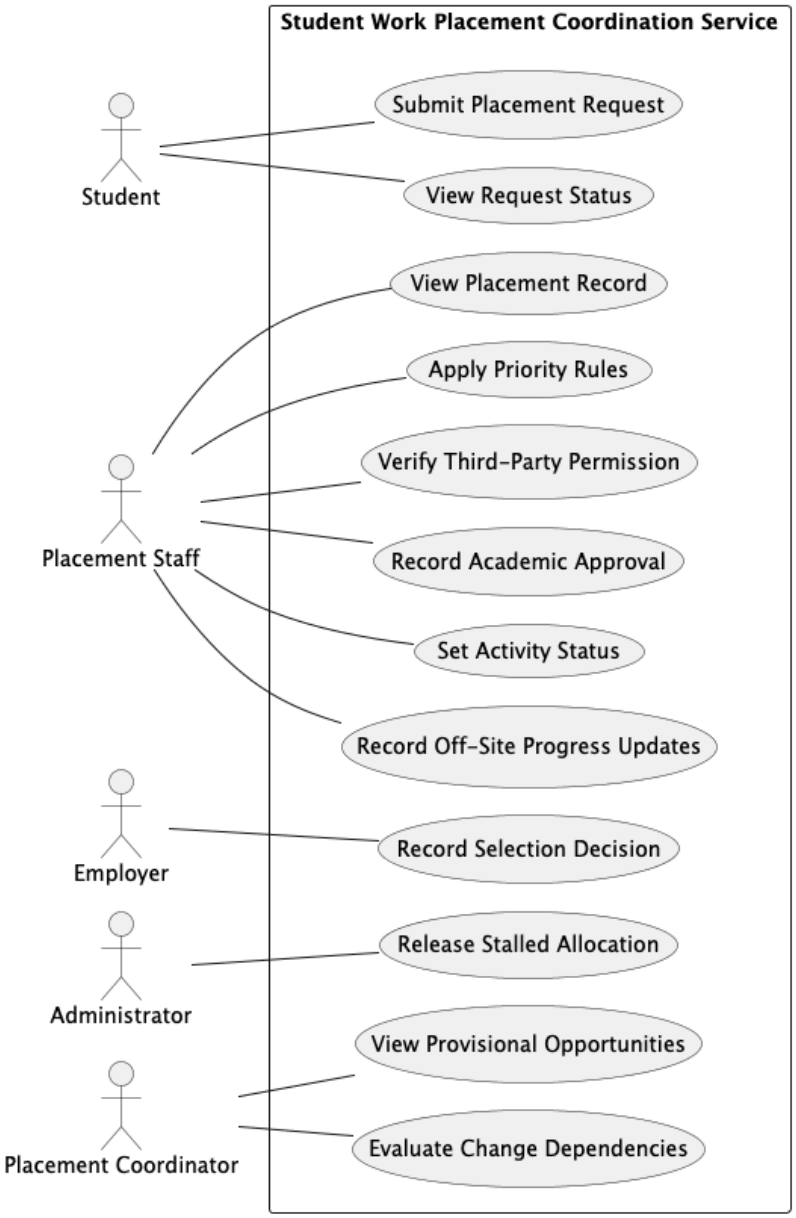

FOR THE FULL WORKINGS OF THIS SECTION, PLEASE SEE `04_From_Requirements_to_User Stories_and_Use_Cases/` |

- USE CASE MODEL
- Named System Boundary
- Actors
- Use Case Catalogue
- Detailed Use Case (Preconditions, Trigger, Success Flow, Alternatives, Exceptions, Postconditions)
  - Task 1: Detailed Use Case
  - Task 2: Main Success Scenario
  - Task 3: Extensions (Alternatives)
  - Task 4: Extensions (Exceptions)
  - Task 5: Postconditions
  - Task 6: From Paths and Rules to Focused Examples

- Task 7: Gherkin Scenario

Named System Boundary

Source: `diagrams/use-case-diagram.puml`

The `Student Work Placement Coordination Service` is the system boundary. Academic records *(OS6)*, recruitment systems *(OS5)*, and legal contract negotiation *(OS4)* sit outside of it. The five primary actors are the only roles that cross this boundary.

Actors

Actor	Use Case(s)
Student	UC01, UC02
Placement Staff	UC03, UC04, UC05, UC07, UC10, UC12
Employer	UC06
Placement Coordinator	UC09, UC11
Administrator	UC08

Offstage stakeholders (SH3, SH6–SH8, SH10–SH12) do not cross the system boundary and so do not appear on the diagram, see Actor Decisions.

Use Case Catalogue

ID	Use Case	Primary Actor	Meaningful Outcome	Source Requirement
UC01	**Submit Placement Request**	Student	A placement request with preferences and programme evidence is recorded.	FR01
UC02	**View Request Status**	Student	The student sees the current status of their request, including whether it is waiting on information, a decision, or an outside organisation.	FR02
UC03	**View Placement Record**	Placement Staff	A single placement record is displayed showing all associated details without searching across separate records.	FR03
UC04	**Apply Priority Rules**	Placement Staff	Student applications are prioritised consistently, using agreed guidelines, and with the applied rule recorded.	FR04
UC05	**Verify Third-Party Permission**	Placement Staff	Placement information is disclosed to a third-party only where the required permission is recorded.	FR05
UC06	**Record Selection Decision**	Employer	The employer selection decision for a student application is recorded.	FR06
UC07	**Record Academic Approval**	Placement Staff	The college academic approval decision is recorded for a placement.	FR07
UC08	**Release Stalled Allocation**	Administrator	A stalled provisional allocation is cleared, freeing up capacity for other students.	FR08
UC09	**View Provisional Opportunities**	Placement Coordinator	Provisional opportunities are identified and not counted as confirmed capacity.	FR09
UC10	**Set Activity Status**	Placement Staff	The status of a placement activity is updated using an agreed, standardised term.	FR10
UC11	**Evaluate Change Dependencies**	Placement Coordinator	Connected arrangements are viewed to assess knock-on impacts before making changes.	FR11
UC12	**Record Off-Site Progress Updates**	Placement Staff	Progress updates recorded without a reliable connection reach the shared record once the connection returns.	FR12

Detailed Use Case (Preconditions, Trigger, Success Flow, Alternatives, Exceptions, Postconditions)

Use Case `UC01: Submit Placement Request` was selected for detailed analysis because it forms the entry point for every placement journey and directly addresses the multi-channel, incomplete intake problem (PR2, FR01, Must).

Business rule *BR01* gives the use case a recoverable alternative path *(4a when missing evidence is supplied)* and a failure path *(4b when evidence remains missing)*, providing clear boundaries for the Gherkin scenarios.

It also exercises key domain classes: `Student`, `Request`, `Programme`, and `Opportunity`, and uses the `ready for decision` and `awaiting evidence` status values from the domain model.

Task 1: Detailed Use Case

Field	Worked Content
ID and Name	UC01: Submit Placement Request

Field	Worked Content
Scope	Student Work Placement Coordination Service
Level	User Goal
Primary Actor	Student
Preconditions	The student is identified by the service, and the target placement opportunity is open for requests.
Trigger	The student decides to request a particular open placement opportunity.
Postcondition(Minimal Guarantee)	No placement request is shown as ready for a decision without the required programme evidence. If the student abandons the submission halfway through, no partial request is recorded. If the submission is incomplete, the student is told what evidence is missing.
Postcondition(Success Guarantee)	The placement request containing preferences and programme evidence is recorded against the student in the single shared placement record, confirmation of receipt is shown, and the current request status can be viewed by the student.
Open Issue(s)	1. What makes a placement opportunity open for requests and who decides when it opens? 2. What placement preference information and programme evidence are required before a request is ready for a decision? 3. Is a request submitted without the required programme evidence recorded and held as awaiting evidence, or is it rejected? *(Working assumption: the request is held with status 'awaiting evidence' until the evidence is supplied. To be confirmed with stakeholders.)* 4. What authority or verification is required if a third-party representative acts on behalf of the student?

Task 2: Main Success Scenario

Step	Actor Intention or System Responsibility
1	The student starts a placement request for an open opportunity.
2	The student supplies their placement preferences.
3	The student supplies the programme evidence required for the request.
4	The system validates that the submission meets the evidence requirements of the students programme.
5	The student confirms the request details.
6	The system records the placement request against the student in the single shared placement record, with status ready for decison.
7	The system confirms to the student that the request has been received and shows the current status.

Task 3: Extensions (Alternatives)

Ref	Condition	Response and Destination
4a	Insufficient Evidence Supplied	1. The system informs the student what evidence is missing. 2. The student supplies the missing evidence. 3. Resume at step 4.

Task 4: Extensions (Exceptions)

Ref	Condition	Response and Destination
4b	Student Cannot Supply Missing Evidence	1. The student confirms the request. 2. The system records the request with status awaiting evidence *(Assumption)*. 3. Use case ends with an incomplete request.
5a	Student Cancels Submission	1. No request is recorded. 2. Use case ends.

Task 5: Postconditions

The success and minimal guarantees are defined in the use-case header. Each path ends as follows:

- **Main Success Scenario:** the request is recorded against the student the current status is shown. *(Success guarantee)*
- **4a (recoverable):** after the missing evidence is supplied, the flow resumes at step 4 and ends as the Main Success Scenario. *(Success guarantee)*
- **4b (failure):** the request is recorded with status *awaiting evidence* (working assumption, open issue 3), and the student has been told what evidence is missing. *(Minimal guarantee only)*
- **5a (cancellation):** no request is recorded. *(Minimal guarantee only)*

On every path, no request is shown as *ready for decision* without the required programme evidence (BR01).

Task 6: From Paths and Rules to Focused Examples

> [!NOTE] The following key was used for this table:
>
> S - Student
>
> OP - Opportunity
>
> P - Programme
>
> E - Evidence

Scenario ID	Source	Concrete Example	Reason
SC1	Main Success Scenario	S1, open opportunity OP7, preferences and evidence E1 + E2 supplied	Representative success
SC2	Extension 4a	E2 missing, then supplied before confirming	Recoverable missing evidence
SC3	Extension 4b	E2 missing and cannot be supplied	Request held as awaiting evidence
SC4	BR01	E1 + E2 supplied, E1 only supplied	Exact evidence boundary
SC5	Extension 5a	Student cancels before confirming	Cancellation, nothing recorded

Task 7: Gherkin Scenario

```
"""
UC01 — SUBMIT PLACEMENT REQUEST
================================
Used the Cucumber docs for how to write gherkin and what extras i could include such as
background, rule, and example table (Cucumber, 2026)
"""

@UC01 @FR01 @US01
Feature: Submit placement request
  As a student, I want to submit my placement preferences and programme evidence so that my
  request can be assessed for a placement decision.

  Background:
    Given student S1 is enrolled on programme P1
    And programme P1 requires evidence items E1 and E2
    And opportunity OP7 is open for requests

  Rule: BR01 — A request must include the evidence required by the student's programme before it is
  ready for a decision

    @SC1 @BR01 @UC01-Main
    Scenario: Student submits a request with all required evidence
      Given the student has supplied preferences and evidence items E1 and E2 for OP7
      When the student confirms the request
      Then the request is recorded against S1 with status "ready for decision"
      And the student is shown that the request has been received
```

```
    @SC2 @BR01 @UC01-4a
    Scenario: Student supplies missing evidence before confirming
      Given the student has supplied preferences and evidence item E1 for OP7
      And the student has been told that evidence item E2 is missing
      And the student has then supplied evidence item E2
      When the student confirms the request
      Then the request is recorded against S1 with status "ready for decision"
      And the student is shown that the request has been received

    @SC3 @BR01 @UC01-4b
    Scenario: Request without all required evidence is held as awaiting evidence
      Given the student has supplied preferences and evidence item E1 for OP7
      When the student confirms the request without evidence item E2
      Then the request is recorded against S1 with status "awaiting evidence"
      And the student is told that evidence item E2 is missing
      And the request is not shown as ready for a decision

    @SC4 @BR01 @UC01-Boundary
    Scenario Outline: Evidence completeness decides whether a request is ready for a decision
      Given the student has supplied preferences and evidence for OP7
      When the student confirms the request
      Then the request is recorded against S1 with status "<status>"

      Examples:
        | supplied        | status             |
        | items E1 and E2 | ready for decision |
        | item E1 only    | awaiting evidence  |

  Rule: A cancelled submission leaves no partial request
    @SC05 @UC01-5a
    Scenario: Student cancels submission before confirming
      Given the student has supplied preferences and evidence for OP7
      When the student cancels before confirming
      Then no request is recorded against S1
```

Candidate Terms

Organisation and Current Service

> [!NOTE] *Kerry College Placement Office coordinates work-placement opportunities for students across several programmes.*
>
> *Opportunities, applications, employer decisions, agreements, supervisor allocation and progress reviews are recorded in separate files and email threads.*

Candidate Term	**Evidence Source**	**Initial Question or Observation**
Kerry College Placement Office	Scenario (P1S1)	The overarching organisation.
Coordinates	Scenario (P1S1)	Business process activities carried out by placement staff
Work-placement opportunities	Scenario (P1S1)	How does an opportunity differ from an advertised vacancy *(P3S4)*?
Students	Scenario (P1S1)	Role that submits preferences and evidence *(P2S1)*.
Programmes	Scenario (P1S1)	Do evidence requirements differ by programme, or are rules shared *(A5)*?
Opportunities	Scenario (P1S2)	Likely the same concept as work-placement opportunities.
Applications	Scenario (P1S2)	Is an application different from a placement request?
Employer	Scenario (P1S2)	External party responsible for selecting candidates.
Employer decisions	Scenario (P1S2)	Is employer selection recorded separately from college academic approval *(P3S2)*?
Agreements	Scenario (P1S2)	Represents confirmed placement terms. Separate from employer legal contracts *(A1)*
Supervisor	Scenario (P1S2)	Is a supervisor a college staff member, an employer contact, or either *(Q8)*?
Supervisor allocation	Scenario (P1S2)	Link between a supervisor and a placement, does it change over time?
Progress reviews	Scenario (P1S2)	Reviews generate new actions and revised arrangements *(P4S5)*.
Recorded	Scenario (P1S2)	Indicates that decisions, allocations, and history require a record.
Files	Scenario (P1S2)	Current fragmented record.

Candidate Term	Evidence Source	Initial Question or Observation
Email threads	Scenario (P1S2)	Communication channel causing fragmented placement tracking.

Requests, Eligibility, and Preparation

> [!NOTE] *Students express preferences and provide evidence required by their programme. An opportunity may be advertised while dates, duties or approval remain provisional.*
>
> *Requests arrive through several channels and may be incomplete. Staff need to distinguish an initial expression of interest, a request awaiting evidence and a request ready for a decision. Priorities and exceptions are not applied consistently.*
>
> *Another person or organisation may assist with a request. Staff are uncertain what authority is required before detailed information or decisions can be shared.*

Candidate Term	Evidence Source	Initial Question or Observation
Students	Scenario (P2S1)	*See organisation and current service*
Express	Scenario (P2S1)	Verb describing student submission of preferences.
Preferences	Scenario (P2S1)	Students choices. Do these link to student interests *(P3S1)*?
Provide	Scenario (P2S1)	Action where students supply required programme evidence.
Evidence	Scenario (P2S1)	Documentation supplied by students. How is evidence completeness verified?
Programme	Scenario (P2S1)	*See organisation and current service*
Opportunity	Scenario (P2S2)	*See organisation and current service*
Advertised	Scenario (P2S2)	Indication of an opportunity being visible for expression of interest.
Dates	Scenario (P2S2)	Likely attributes of an opportunity.
Duties	Scenario (P2S2)	Likely attribute describing opportunity responsibilities.
Approval	Scenario (P2S2)	Is this the same as academic approval, or approval of the opportunity itself *(P3S2)*?
Provisional	Scenario (P2S2)	Indicates dates, duties, or approvals are not final.
Requests	Scenario (P2S3)	Submission completed by a student, and tracked across channels.
Arrive	Scenario (P2S3)	Describes the incoming submission of a placement request.
Several Channels	Scenario (P2S3)	Multiple submission routes, process detail.
Incomplete	Scenario (P2S3)	State of a request where evidence or details are missing.
Staff	Scenario (P2S4)	Role processing requests, possibly several roles.
Distinguish	Scenario (P2S4)	Differentiate request states for next action steps.
Initial Expression of Interest	Scenario (P2S4)	Early request before required evidence supplied.
Request Awaiting Evidence	Scenario (P2S4)	Request state indicating required student evidence is missing.
Request Ready for a Decision	Scenario (P2S4)	Request state once required programme evidence is supplied *(BR01)*.
Priorities	Scenario (P2S5)	Rules for processing applications, currently unagreed *(Q2)*
Exceptions	Scenario (P2S5)	Unagreed *(Q2)*. Does each exception need its specific reason recorded?
Applied	Scenario (P2S5)	Enforcement of priority rules / exception criteria on a request.
Another Person or Organisation	Scenario (P2S6)	Third party acting on a students behalf, offstage stakeholder *(SH3)*
Assist	Scenario (P2S6)	Action performed by a third party helping a student with a request.
Authority	Scenario (P2S7)	Permission required before sharing student details, currently uncertain *(Q3)*
Detailed Information	Scenario (P2S7)	Student placement data protected from unauthorised disclosure *(NFR02)*.
Decisions	Scenario (P2S7)	Is this an employer decision or academic *(P1S2)*?

Candidate Term	Evidence Source	Initial Question or Observation
Shared	Scenario (P2S7)	Disclosing placement information of status updates to outside party?

Allocation and Coordination

> [!NOTE] *Matching considers programme outcomes, student interests, employer requirements, location, capacity and potential conflicts. Employer selection and academic approval are separate decisions.*
>
> *Capacity depends on a combination of people, places, resources and timing. A visible vacancy does not necessarily mean that every requirement is satisfied. Provisional allocations sometimes remain in place while essential information is still missing.*
>
> *Changes can affect several linked arrangements. Staff need to preserve the current confirmed position while retaining evidence of earlier decisions and versions.*

Candidate Term	Evidence Source	Initial Question or Observation
Matching	Scenario (P3S1)	Core activity satisfying multiple conditions at once, or a match as an outcome *(P6S1, BR04)*?
Considers	Scenario (P3S1)	Evaluation of matching.
Programme Outcomes	Scenario (P3S1)	Academic learning goals, attribute of programme or condition for matching?
Student Interests	Scenario (P3S1)	Student preference details, attribute of student or preference concept?
Employer Requirements	Scenario (P3S1)	Employer criteria for openings, likely attribute of opportunity?
Location	Scenario (P3S1)	Physical location, likely attribute.
Capacity	Scenario (P3S1)	Depends on people, places, resources, and timing *(P3S3)*?
Potential Conflicts	Scenario (P3S1)	Conflict between placement requirements?
Employer Selection	Scenario (P3S2)	Same as employer decisions? *(P1S2)*
Academic Approval	Scenario (P3S2)	College approval decision, recorded separately alongside employer selection *(BR05)*.
Separate Decisions	Scenario (P3S2)	Placement requiring two independent decision outcomes.
Depends on	Scenario (P3S3)	Dependency for capacity.
People	Scenario (P3S3)	Candidate class or role?
Places	Scenario (P3S3)	Physical location.
Resources	Scenario (P3S3)	Items required for a placement.
Timing	Scenario (P3S3)	Placement schedule and dates, likely attribute of placement.
Visible Vacancy	Scenario (P3S4)	Same as an opportunity *(P1S1, P2S2)*? Does not mean every requirement is met *(P6S1)*
Satisfied	Scenario (P3S4)	Indicator that all requirements for a match are met *(BR04)*.
Provisional Allocations	Scenario (P3S5)	Holds on capacity, how do these differ from provisional opportunities *(P2S2, BR08, Q4)*?
Remain	Scenario (P3S5)	Describes stalled provisional allocations holding capacity over time *(P6S3)*.
Essential Information	Scenario (P3S5)	Required information, does this relate to evidence completeness?
Missing	Scenario (P3S5)	Incomplete records
Changes	Scenario (P3S6)	Revisions to arrangements, triggering knock-on effects across connected placements.
Affect	Scenario (P3S6)	Describes knock-on effect across linked arrangements.
Linked Arrangements	Scenario (P3S6)	Connected arrangements a change can affect, is this its own concept *(FR11)*?

Candidate Term	Evidence Source	Initial Question or Observation
Staff	Scenario (P3S7)	*See Requests, Eligibility, and Preparation*
Preserve	Scenario (P3S7)	Expression of rule that earlier decisions must not be overwritten *(BR06)*
Current Confirmed Position	Scenario (P3S7)	Active and agreed state of a placement *(BR06)*.
Retaining Evidence	Scenario (P3S7)	Record of earlier decisions or programme evidence?
Earlier Decisions and Versions	Scenario (P3S7)	Historical decisions and arrangements, to be preserved when new updates are recorded *(BR06, NFR04)*.

Progress, Review, and Exceptions

> [!NOTE] *Staff record progress, decisions and outstanding actions using notes, messages and spreadsheets. Different teams use status terms differently, making it difficult to identify what is awaiting action and who is responsible.*
>
> *A planned activity may be changed, partially completed, paused or withdrawn. Staff need to distinguish an operational change from a formal decision and avoid treating silence as approval.*
>
> *Reviews may generate new actions, revised arrangements or escalation. Earlier evidence should not be overwritten when circumstances change.*

Candidate Term	Evidence Source	Initial Question or Observation
Staff	Scenario (P4S1)	*See Requests, Eligibility, and Preparation*
Record	Scenario (P4S1)	Retention of progress, decisions, and actions. *See Organisation and Current Service*
Progress	Scenario (P4S1)	Activity status and history, linked to progress reviews *(P1S2)* and off-site updates *(FR12)*
Decisions	Scenario (P4S1)	*See Organisation and Current Service* and *Requests, Eligibility, and Preparation*
Outstanding Actions	Scenario (P4S1)	Tasks awaiting action, requires clear ownership and status *(PR7)*
Notes	Scenario (P4S1)	Current informal recording method, may be kept when reviewing, target for replacement *(PR1)*
Messages	Scenario (P4S1)	Current communication channel, process detail, target for replacement *(PR1)*
Spreadsheets	Scenario (P4S1)	Current tracking mechanism, target for replacement *(PR1)*
Teams	Scenario (P4S2)	Organisational groups using status terms differently, is this a candidate concept?
Status Terms	Scenario (P4S2)	Values describing activity states, requiring agreed standardised definitions across teams *(PR7, FR10)*
Awaiting Action	Scenario (P4S2)	State condition indicating an outstanding task requires attention
Responsible	Scenario (P4S2)	Task ownership, requiring clear assignment to a team or staff member *(PR7, FR10)*
Planned Activity	Scenario (P4S3)	Work placement activity or task within a placement setup
Changed	Scenario (P4S3)	State value altered
Partially Completed	Scenario (P4S3)	Possible status value of an activity *(FR10)*?
Paused	Scenario (P4S3)	Possible status value of an activity *(FR10)*?
Withdrawn	Scenario (P4S3)	Possible status value of an activity *(FR10, Q5)*?
Distinguish	Scenario (P4S4)	Need to separate activity edits from formal decisions *(BR07)*
Operational Change	Scenario (P4S4)	Change to planned arrangements, separate from a formal decision *(BR07)*
Formal Decision	Scenario (P4S4)	Includes Employer selection and academic approval *(BR07, P3S2)*?
Silence	Scenario (P4S4)	No response, must not be treated as approval *(BR07)*
Approval	Scenario (P4S4)	*See Requests, Eligibility, and Preparation*

Candidate Term	Evidence Source	Initial Question or Observation
Reviews	Scenario (P4S5)	Same as progress reviews *(P1S2)*? Generates new actions, revised arrangements, or escalation
Generate	Scenario (P4S5)	Shows progress reviews create actions, arrangements, or escalation
New Actions	Scenario (P4S5)	Tasks created as an outcome of a review
Revised Arrangements	Scenario (P4S5)	Updated placement conditions resulting from a review *(P3S6, FR11)*
Escalation	Scenario (P4S5)	Outcome of a review, to who and when does this occur?
Earlier Evidence	Scenario (P4S6)	Evidence of earlier decision making *(P3S7, BR06)*, not programme evidence *(P2S1)*?
Overwritten	Scenario (P4S6)	Replacing existing records, preserve decision history *(BR06, NFR04)*
Circumstances Change	Scenario (P4S6)	Event triggering revisions to placement arrangements without erasing history

Information, Reporting, and Scope

> [!NOTE] *The coordinator needs information about unallocated requests, provisional arrangements, capacity conflicts, overdue actions and incomplete records. External partners should receive only the information required for their role.*
>
> *Summary reporting is needed for management and funders without exposing unnecessary personal or commercially sensitive information. Connectivity may be unreliable during off-site work.*
>
> *The initial scope covers service coordination and records. Specialist professional systems, financial accounting and unrelated public website functions are outside scope.*

Candidate Term	Evidence Source	Initial Question or Observation
Coordinator	Scenario (P5S1)	Actor reponsible for tracking unalloacted requests and capacity *(SH5)*
Needs	Scenario (P5S1)	Expressing oversight and reporting requirements for coordination
Information	Scenario (P5S1)	Broad concept, what placement details are visible to each role *(CS3)*?
Unallocated Requests	Scenario (P5S1)	A request state, similar to stages in *(Request, Eligibility, and Preparation)*?
Provisional Arrangements	Scenario (P5S1)	Same as provisional allocations *(P3S5, BR08)*?
Capacity Conflicts	Scenario (P5S1)	Same as potential conflicts *(P3S1)*?
Overdue Actions	Scenario (P5S1)	Same as outstanding actions *(P4S1)*?
Incomplete Records	Scenario (P5S1)	Records missing, required details. Same as incomplete requests *(P2S3)*?
External Partners	Scenario (P5S2)	Offstage stakeholders *(SH6)*, receives role-restricted placement updates *(NFR01, CS3)*
Receive	Scenario (P5S2)	Describes access to role-restrictred placement information
Role	Scenario (P5S2)	Defines what information each role may receive *(NFR01, CS3)*
Summary Reporting	Scenario (P5S3)	Summary information on activity and outcomes *(SH7, SH8)*
Needed	Scenario (P5S3)	Express management and funder requirements for summary reporting
Management	Scenario (P5S3)	Offstage stakeholder *(SH7)* requiring summary information on placement activity

Candidate Term	Evidence Source	Initial Question or Observation
Funders	Scenario (P5S3)	Offstage stakeholder *(SH8)* requiring summary information on placement numbers *(A4)*
Exposing	Scenario (P5S3)	Disclosing sensitive details *(NFR01, CS3)*
Unnecessary	Scenario (P5S3)	Information beyond what a role or summary report requires *(CS3)*
Personal or Commercially Sensitive Information	Scenario (P5S3)	Confidential student or placement information, not included in summaries *(A4, CS3, NFR01)*
Connectivity	Scenario (P5S4)	Off-site connection affecting recording *(PR9, CS2)*
Unreliable	Scenario (P5S4)	State of connection during off-site operations *(PR9, CS2)*
Off-site work	Scenario (P5S4)	Operational context where staff record updates away from the main office *(CS2, FR12, NFR03)*
Initial Scope	Scenario (P5S5)	Defines initial system deliverables *(CS1)*
Service Coordination	Scenario (P5S5)	Functional boundary in initial release *(CS1)*
Records	Scenario (P5S5)	Same as the single placement record *(P1S2, FR03)*?
Specialist Professional Systems	Scenario (P5S6)	Out of Scope *(OS1)*
Financial Accounting	Scenario (P5S6)	Out of Scope *(OS2)*
Unrelated Public Website Functions	Scenario (P5S6)	Out of Scope *(OS3)*
Outside Scope	Scenario (P5S6)	Defines classification of excluded areas *(OS1 - OS6)*

Stakeholder Evidence

> [!NOTE]
>
> - **Coordinator:** “A vacancy is not a match unless all of the important requirements are satisfied.”
> - **Service user:** “I need to know whether I am waiting for information, a decision or an outside organisation.”
> - **Administrator:** “Provisional arrangements can block capacity long after the original request has stalled.”
> - **Partner representative:** “I need the information required for my role, not the complete case history.”
> - **Reviewer:** “New information should be added without erasing the basis of the earlier decision.”
> - **Manager:** “We need consistent reasons for delay, withdrawal and incomplete outcomes.”

Candidate Term	Evidence Source	Initial Question or Observation
Coordinator	Scenario (P6S1)	Primary actor *(SH5, P5S1)*
Vacancy	Scenario (P6S1)	Open place, same as a work placement opportunity *(P1S1, P2S2)*?
Match	Scenario (P6S1)	Placement where all important requirements are satisfied *(P3S1, BR04)*
Important Requirements	Scenario (P6S1)	Criteria that must be met before a vacancy becomes a match *(P3S1, BR04)*
Satisfied	Scenario (P6S1)	State condition indicating all matching requirements are met *(BR04)*
Service User	Scenario (P6S2)	Stakeholder term for requester, same as student *(A6)*?

Candidate Term	Evidence Source	Initial Question or Observation
Need	Scenario (P6S2)	Expressing requirement for request status visibility *(FR02)*
Know	Scenario (P6S2)	Indicating student awareness of request status or waiting condition *(FR02)*
Waiting	Scenario (P6S2)	State condition of a request awaiting information, a decision, or an outside organisation *(FR02)*
Information	Scenario (P6S2)	Whatever details the request is waiting on
Decision	Scenario (P6S2)	*(P1S2, P2S7)*, what decisions do the student wait on?
Outside Organisation	Scenario (P6S2)	Employer, or an assisting organisation? *(P2S6)*
Administrator	Scenario (P6S3)	Primary actor *(SH9)* responsible for monitoring and releasing provisional allocations *(FR08, BR08)*
Provisional Arrangements	Scenario (P6S3)	Holds on capacity, same as provisional allocations *(P3S5, BR08)*?
Block	Scenario (P6S3)	Unreleased provisional allocations prevent other students from accessing capacity *(PR5, FR08)*
Capacity	Scenario (P6S3)	*See Allocation and Coordination*
Original Request	Scenario (P6S3)	Initial submission made by a student *(P2S3, FR01)*
Stalled	Scenario (P6S3)	Request or allocation that has stopped progressing *(PR5, BR08)*
Partner Representative	Scenario (P6S4)	Offstage stakeholder *(SH6)*, same as external partners *(A7, P5S2)*
Required	Scenario (P6S4)	State conidtion defining information necessary for a specific role *(CS3)*
Role	Scenario (P6S4)	Defines information access boundaries *(NFR01, CS3)*
Complete Case History	Scenario (P6S4)	Full history of a placement *(P5S2, NFR01)*
Reviewer	Scenario (P6S5)	Offstage stakeholder *(SH10)*, concerned that new information does not release earlier decisions *(BR06)*
New Information	Scenario (P6S5)	Added during reviews or at any time *(P4S5)*?
Added	Scenario (P6S5)	Recording of new review notes without removing earlier information *(BR06, NFR04)*
Erasing	Scenario (P6S5)	Removing earlier information, preserve decision history *(BR06, NFR04)*
Basis	Scenario (P6S5)	Reason supporting earlier decisions *(P3S7, P4S6, BR06)*
Earlier Decision	Scenario (P6S5)	*(P4S6)*, is this the same concept?
Manager	Scenario (P6S6)	Offstage stakeholder *(SH7)*, requiring summary information on activity. Same as management *(P5S3)*?
Need	Scenario (P6S6)	Express management requirement for tracking delay, withdrawal, and incomplete outcomes *(P6S2)*
Consistent Reasons	Scenario (P6S6)	Agreed list of reasons for outcomes and delays *(P4S2, FR10)*
Delay	Scenario (P6S6)	Reason category the manager wants recorded
Withdrawal	Scenario (P6S6)	Possible status value of an activity request *(P4S3, Q5)*
Incomplete Outcomes	Scenario (P6S6)	Result state where required details or steps are missing, same as incomplete records *(P5S1)*?

Unresolved Matters

> [!NOTE] The scenario does not confirm every policy or decision. Clarification may be required about:
>
> - what information is required before a request is ready for decision,
> - how eligibility, priority and exceptions should be applied,
> - what authority is required when another person acts for the requester,
> - when provisional allocations should expire or become confirmed,

> - who may approve changes, substitutions or withdrawal,
> - how versions, reviews and outstanding actions should be related,
> - which information may be shared with staff, partners and funders.

Candidate Term	Evidence Source	Initial Question or Observation
Policy or Decision	Scenario (P7S1)	Concept covering business rules, requests, allocations, and approvals *(BR01 - BR08)*.
Clarification Required	Scenario (P7S1)	Concept covering open questions requiring stakeholder confirmation *(Q1 - Q7)*
Information Required	Scenario (P7S2)	Information needed before a request is ready for a decison *(P2S4, Q1, BR01)*
Ready for Decision	Scenario (P7S2)	Request state *(P2S4, Q1, BR01)*
Eligibility	Scenario (P7S3)	Business rule for who may apply, not agreed *(Q2, BR02)*
Priority	Scenario (P7S3)	Ranking rule when ordering requests, not agreed *(Q2, BR02, P2S5)*
Exceptions	Scenario (P7S3)	*See Requests, Eligibility, and Preparation (P2S5)*
Applied	Scenario (P7S3)	*See Requests, Eligibility, and Preparation (P2S5)*
Authority Required	Scenario (P7S4)	Required authorisation when a representative acts for a student, *See Requests, Eligibility, and Preparation (P2S7, Q3, BR03)*
Acts for Requester	Scenario (P7S4)	Third party submitting or managing on student's behalf, same as another person or organisation *(P2S6)*?
Provisional Allocations	Scenario (P7S5)	*See Allocation and Coordination (P3S5, P6S3, BR08)*
Expire	Scenario (P7S5)	Not agreed, requires clarification *(Q4)*. Possible state change of an allocation
Become Confirmed	Scenario (P7S5)	Not agreed, requires clarification *(Q4)* Transition from provisional hold to finalised allocation?
Approve Changes	Scenario (P7S6)	Not agreed, requires clarification *(Q5)*. Who has authority to approve modifications?
Substitutions	Scenario (P7S6)	Not agreed, requires clarification *(Q5)*. Possible change to a placement or request?
Withdrawal	Scenario (P7S6)	*See Progress, Review and Exceptions * *(P4S3, FR10, Q5)*
Versions	Scenario (P7S7)	Historical revisions of placement records, not agreed how these link *(Q6, FR03, BR06)*
Reviews	Scenario (P7S7)	*See Progress, Review, and Exceptions (P4S5, BR06, NFR04, Q6)*
Outstanding Actions	Scenario (P7S7)	*See Progress, Review, and Exceptions (P4S1, Q6)*, are these the same as overdue actions *(P5S1)*?
Related	Scenario (P7S7)	Not agreed, how do versions, reviews, and actions link *(Q6)*?
Shared	Scenario (P7S8)	*See Requests, Eligibility, and Preparation (P2S7,NFR01, NFR02, BR03, CS3, Q7)*.
Staff	Scenario (P7S8)	*See Requests, Eligibility, and Preparation (P2S4 SH2, SH5, SH9, Q7)*

Candidate Term	Evidence Source	Initial Question or Observation
Partners	Scenario (P7S8)	*See Information, Reporting, and Scope (P5S2 SH6, Q7)*
Funders	Scenario (P7S8)	*See Information, Reporting, and Scope (P5S3 SH8, Q7)*

Classification

Organisation and Current Service

Candidate	Classification	Reason
Kerry College Placement Office	Out of scope / Implementation	Names the organisation, defines business and system boundary.
Coordinates	Operation or Event	Functional verb describing business process activities, does not reveal a transaction or class.
Work-placement opportunities	Conceptual Class	Candidate concept for placement openings, possibly the same as Opportunity, resolved in Task 3.
Students	Actor & Conceptual Class	Primary actor submitting requests, also a domain class with identity and history.
Programmes	Conceptual Class	Holds evidence requirements and outcomes used for requests and matching *(A5, BR01, P3S1)*, academic records stay external *(A3)*.
Opportunities	Conceptual Class	Candidate concept for placement openings, possibly the same as Opportunity, resolved in Task 3.
Applications	Conceptual Class	Candidate class representing student submissions, possibly the same as Request, resolved in Task 3.
Employer	Actor	Primary actor *(SH4)* offering placements and recording selection decisions *(UC06)*.
Employer decisions	Conceptual Class	Recorded decision outcome with history *(BR05, BR06)*.
Agreements	Conceptual Class	Confirmed placement terms, separate from formal legal contracts *(A1)*.
Supervisor	Conceptual Class	Candidate class representing assigned supervisor contacts, requires clarification *(Q8)*.
Supervisor allocation	Conceptual Class	Recorded assignment linking a supervisor to a placement *(BR06)*.
Progress reviews	Conceptual Class	Recorded review activity that adds new information without erasing history *(BR06)*.
Recorded	Operation or Event	Verb indicating underlying records and history preservation.
Files	Out of scope / Implementation	Informal tracking mechanism used in current manual process.
Email threads	Out of scope / Implementation	Informal communication channel used in current manual process.

Requests, Eligibility, and Preparation

Candidate	Classification	Reason
Students	Actor & Conceptual Class	Duplicate, see Students *(P1S1)*.
Express	Operation or Event	Functional verb describing student submission, does not reveal a transaction or class.
Preferences	Attribute or Value	Student choices and personal interests used during matching.

Candidate	Classification	Reason
Provide	Operation or Event	Functional verb describing student action, does not reveal a transaction or class.
Evidence	Attribute or Value	Documentation supplied by students to satisfy programme requirements.
Programme	Conceptual Class	Duplicate, see Programmes *(P1S1)*.
Opportunity	Conceptual Class	Core domain class representing work-placement openings.
Advertised	Attribute or Value	Descriptive status value indicating opportunity visibility.
Dates	Attribute or Value	Schedule attributes associated with opportunities or placements.
Duties	Attribute or Value	Descriptive attributes detailing opportunity responsibilities.
Approval	Conceptual Class	Candidate class for approval decisions, academic approval or approval of the opportunity *(P2S2)*? Requires clarification.
Provisional	Attribute or Value	Descriptive status value indicating unfinalised terms or holds.
Requests	Conceptual Class	Core candidate class representing incoming student submissions, possibly the same as Application, resolved in Task 3.
Arrive	Operation or Event	Functional verb describing incoming requests, does not reveal a transaction or class.
Several Channels	Out of scope / Implementation	Multiple intake mechanisms used in current manual process.
Incomplete	Attribute or Value	Status value indicating missing details or evidence.
Staff	Actor	General internal role processing requests and managing placement activities *(SH2)*.
Distinguish	Operation or Event	Functional verb describing user action, does not reveal a transaction or class.
Initial Expression of Interest	Attribute or Value	Early status stage of a request before required evidence is supplied.
Request Awaiting Evidence	Attribute or Value	Request status stage indicating required evidence is missing.
Request Ready for a Decision	Attribute or Value	Request status stage indicating required evidence is complete *(BR01)*.
Priorities	Attribute or Value	Priority rules or ranking criteria applied when ordering requests (BR02), criteria not agreed *(Q2)*.
Exceptions	Conceptual Class	Recorded with its reason and who granted it *(US04 AC4, BR02)*, rules not agreed *(Q2)*.
Applied	Operation or Event	Functional verb describing rule application, does not reveal a transaction or class.
Another Person or Organisation	Out of scope / Implementation	Offstage stakeholder *(SH3)*, does not interact with the system boundary.
Assist	Operation or Event	Functional verb describing representative action, does not reveal a transaction or class.
Authority	Conceptual Class	Recorded permission for a third party acting on a student's behalf *(FR05, BR03)*, required authority not agreed *(Q3)*.
Detailed Information	Attribute or Value	Information elements restricted by role *(CS3, NFR01)*.
Decisions	Conceptual Class	Recorded decision outcome preserved in decision history (BR06).
Shared	Operation or Event	Action describing information disclosure across boundaries *(CS3)*.

Allocation and Coordination

Candidate	Classification	Reason
Matching	Operation or Event	Core business process evaluating requirements for placement pairing.

Candidate	Classification	Reason
Considers	Operation or Event	Functional verb describing matching process, does not reveal a transaction or class.
Programme Outcomes	Attribute or Value	Attribute of Programme, used as a matching criterion *(P3S1)*.
Student Interests	Attribute or Value	Student choices and personal interests used during matching.
Employer Requirements	Attribute or Value	Employer criteria for openings.
Location	Attribute or Value	Physical location detail associated with an opportunity or preference.
Capacity	Attribute or Value	Number of available places based on people, places, resources, and timing *(P3S3)*.
Potential Conflicts	Conceptual Class	Candidate class for tracking overlapping placement demands and conflicts.
Employer Selection	Conceptual Class	Recorded decision when an employer selects a candidate, preserved in decision history *(BR05, BR06)*.
Academic Approval	Conceptual Class	Recorded decision when the college approves a placement, preserved in decision history *(BR05, BR06)*.
Separate Decisions	Out of scope / Implementation	Statement describing independent decision outcomes, covered by *(BR05)*.
Depends on	Operation or Event	Functional verb describing capacity dependency, does not reveal a transaction or class.
People	Attribute or Value	General category covering Supervisor, Student and Staff, already candidates, no separate identity *(P3S3)*.
Places	Attribute or Value	Where a placement takes place, same as Location unless sites need their own capacity *(P3S3)*.
Resources	Attribute or Value	Operational factors used to determine overall placement capacity.
Timing	Attribute or Value	Schedule attributes associated with opportunities or placements.
Visible Vacancy	Conceptual Class	Stakeholders' term for open placement openings, candidate synonym for Opportunity, resolved in Task 3.
Satisfied	Attribute or Value	State condition indicating all matching requirements are met *(BR04)*.
Provisional Allocations	Conceptual Class	Domain class representing tentative capacity holds awaiting final confirmation or release *(BR08)*.
Remain	Operation or Event	Functional verb describing state duration, does not reveal a transaction or class.
Essential Information	Attribute or Value	Required details missing from an allocation.
Missing	Attribute or Value	Status value indicating missing records or details.
Changes	Conceptual Class	Recorded revisions to placement setups that affect linked arrangements *(FR11)*.
Affect	Operation or Event	Functional verb describing knock-on impact, does not reveal a transaction or class.
Linked Arrangements	Conceptual Class	Domain class representing dependent placement setups and connections (FR11).
Staff	Actor	Duplicate, see Staff *(P2S4)*.
Preserve	Operation or Event	Verb indicating underlying records and history preservation.
Current Confirmed Position	Conceptual Class	Domain class capturing the active agreed placement state *(BR06)*.
Retaining Evidence	Operation or Event	Action of keeping evidence of earlier decisions *(P3S7, BR06)*, reveals the history captured by Earlier Evidence.
Earlier Decisions and Versions	Conceptual Class	Historical decision records preserved in decision history *(BR06, NFR04)*.

Progress, Review, and Exceptions

Candidate	Classification	Reason
Staff	Actor	Duplicate, see Staff *(P2S4)*.
Record	Operation or Event	Verb indicating underlying records and history preservation.
Progress	Attribute or Value	Descriptive tracking status and operational activity details.
Decisions	Conceptual Class	Duplicate, see Decisions *(P2S7)*.
Outstanding Actions	Conceptual Class	Domain class representing tasks and follow-ups requiring tracking and ownership.
Notes	Out of scope / Implementation	Informal recording method used in current manual process.
Messages	Out of scope / Implementation	Informal communication channel used in current manual process.
Spreadsheets	Out of scope / Implementation	Informal tracking mechanism used in current manual process.
Teams	Attribute or Value	Team a staff member belongs to, no separate identity needed *(P4S2)*. Responsibility is assigned to a person *(US10 AC2)*.
Status Terms	Attribute or Value	Descriptive status values indicating current state of a request, allocation, or connection.
Awaiting Action	Attribute or Value	State condition indicating an outstanding task requires attention.
Responsible	Attribute or Value	Task ownership assignment for an action or activity.
Planned Activity	Conceptual Class	Domain class representing tasks or work components within a placement setup.
Changed	Attribute or Value	Status values describing the state of a planned activity or request.
Partially Completed	Attribute or Value	Status values describing the state of a planned activity or request.
Paused	Attribute or Value	Status values describing the state of a planned activity or request.
Withdrawn	Attribute or Value	Status values describing the state of a planned activity or request.
Distinguish	Operation or Event	Functional verb describing user action, does not reveal a transaction or class.
Operational Change	Conceptual Class	Recorded operational adjustment distinct from a formal decision *(BR07)*.
Formal Decision	Conceptual Class	Recorded decision outcome preserved in decision history *(BR06, BR07)*.
Silence	Out of scope / Implementation	Captured as a business rule, silence must not be treated as approval *(BR07)*.
Approval	Conceptual Class	Duplicate, see Approval *(P2S2)*.
Reviews	Conceptual Class	Activity recorded to add new information without erasing earlier history *(BR06)*, possibly the same as Progress reviews *(P1S2)*, resolved in Task 3.
Generate	Operation or Event	Verb indicating creation of underlying action items.
New Actions	Conceptual Class	Domain class representing tasks created as review outcomes requiring tracking and ownership.
Revised Arrangements	Conceptual Class	Candidate class for updated placement conditions resulting from a review, resolved in Task 3.
Escalation	Operation or Event	Review outcome event referring a matter for further action.
Earlier Evidence	Conceptual Class	Record of earlier decision-making preserved when circumstances change *(P4S6, BR06, NFR04)*, possibly the same as Earlier Decisions and Versions *(P3S7)*, resolved in Task 3.
Overwritten	Operation or Event	Verbs indicating deletion or overwriting, prohibited to preserve history.
Circumstances Change	Operation or Event	Operational event triggering updates without erasing earlier evidence.

Information, Reporting, and Scope

Candidate	Classification	Reason
Coordinator	Actor	Primary actor tracking unallocated requests, capacity, and operational progress *(SH5)*.
Needs	Operation or Event	Functional verb expressing stakeholder requirements, does not reveal a transaction or class.
Information	Attribute or Value	Broad domain concept, too general to be a class.
Unallocated Requests	Attribute or Value	Status stage representing an unassigned student request.
Provisional Arrangements	Conceptual Class	Stakeholders term for capacity holds, candidate synonym for Provisional Allocation, resolved in Task 3.
Capacity Conflicts	Conceptual Class	Candidate class for tracking overlapping placement demands and conflicts.
Overdue Actions	Conceptual Class	Candidate class representing overdue tasks, candidate synonym for Outstanding Actions, resolved in Task 3.
Incomplete Records	Attribute or Value	Status value indicating missing records or details.
External Partners	Out of scope / Implementation	Offstage stakeholder *(SH6)*, not an actor, role restrictions captured by CS3 and NFR01.
Receive	Operation or Event	Functional verb describing information access, does not reveal a transaction or class.
Role	Attribute or Value	Functional position defining information access boundaries *(NFR01, CS3)*.
Summary Reporting	Out of scope / Implementation	Generated output produced from existing placement records, not a concept to remember *(P5S3)*, no saved report history required, and no FR in the initial release.
Needed	Operation or Event	Functional verb expressing stakeholder requirements, does not reveal a transaction or class.
Management	Out of scope / Implementation	Offstage stakeholder *(SH7)*, does not interact with the system boundary.
Funders	Out of scope / Implementation	Offstage stakeholder *(SH8)*, does not interact with the system boundary.
Exposing	Operation or Event	Functional verb describing disclosure, does not reveal a transaction or class.
Unnecessary	Attribute or Value	Descriptive term describing redundant details, does not reveal a transaction or class.
Personal or Commercially Sensitive Information	Attribute or Value	Specific information elements restricted by role *(CS3, NFR01)*.
Connectivity	Out of scope / Implementation	Environmental condition, not a domain concept, handled as a quality requirement *(NFR03, CS2)* for in-scope off-site recording *(IS9, FR12)*.
Unreliable	Attribute or Value	Status value describing connection state during off-site work.
Off-site work	Out of scope / Implementation	Environmental context affecting record updates during off-site operations.
Initial Scope	Out of scope / Implementation	Functional boundaries defining initial release deliverables.
Service Coordination	Out of scope / Implementation	Names the scope boundary, not a domain concept.
Records	Conceptual Class	Core placement record capturing details, decisions, and history *(FR03)*.
Specialist Professional Systems	Out of scope / Implementation	Excluded external system component.
Financial Accounting	Out of scope / Implementation	Excluded external system component.

Candidate	Classification	Reason
Unrelated Public Website Functions	Out of scope / Implementation	Excluded functional domain boundary.
Outside Scope	Out of scope / Implementation	Classification for excluded areas.

Stakeholder Evidence

Candidate	Classification	Reason
Coordinator	Actor	Duplicate, see Coordinator *(P5S1)*.
Vacancy	Conceptual Class	Stakeholders' term for open placement positions, candidate synonym for Opportunity, resolved in Task 3.
Match	Conceptual Class	Candidate class for placement pairings where all requirements are satisfied *(BR04)*.
Important Requirements	Attribute or Value	Requirements (outcomes, interests, location, capacity) needed for a match *(BR04)*.
Satisfied	Attribute or Value	Duplicate, see Satisfied *(P3S4)*.
Service User	Actor & Conceptual Class	Stakeholder term for requester, candidate synonym for Student *(A6)*, resolved in Task 3.
Need	Operation or Event	Duplicate, see Needs *(P5S1)*.
Know	Operation or Event	Functional verb describing user awareness, does not reveal a transaction or class.
Waiting	Attribute or Value	Status stage representing progress of a student request or waiting condition.
Information	Attribute or Value	Duplicate, see Information *(P5S1)*.
Decision	Conceptual Class	Duplicate, see Decisions *(P2S7)*.
Outside Organisation	Out of scope / Implementation	Offstage stakeholder *(SH3)*, does not interact with the system boundary.
Administrator	Actor	Primary actor monitoring and releasing provisional allocations *(SH9)*.
Provisional Arrangements	Conceptual Class	Duplicate, see Provisional Arrangements *(P5S1)*.
Block	Operation or Event	Verb indicating unreleased provisional allocations holding capacity.
Capacity	Attribute or Value	Duplicate, see Capacity *(P3S1)*.
Original Request	Conceptual Class	Candidate synonym for student request submissions, resolved in Task 3.
Stalled	Attribute or Value	Status value indicating a request or allocation that has stopped progressing.
Partner Representative	Out of scope / Implementation	Offstage stakeholder *(SH6)*, does not interact with the system boundary.
Required	Operation or Event	Functional verb describing necessity, does not reveal a transaction or class.
Role	Attribute or Value	Duplicate, see Role *(P5S2)*.
Complete Case History	Out of scope / Implementation	Derived output generated from existing records.
Reviewer	Out of scope / Implementation	Offstage stakeholder *(SH10)*, does not interact with the system boundary.
New Information	Attribute or Value	Notes or details added during reviews or ongoing tracking.
Added	Operation or Event	Functional verb describing addition of notes, does not reveal a transaction or class.
Erasing	Operation or Event	Verbs indicating deletion or overwriting, prohibited to preserve history.

Candidate	Classification	Reason
Basis	Attribute or Value	Context and reasons supporting an earlier decision.
Earlier Decision	Conceptual Class	Prior decision preserved in decision history *(BR06)*.
Manager	Out of scope / Implementation	Offstage stakeholder *(SH7)*, does not interact with the system boundary.
Need	Operation or Event	Duplicate, see Needs *(P5S1)*.
Consistent Reasons	Attribute or Value	Candidate list of reasons for tracking delays, withdrawals, and incomplete outcomes *(US10)*.
Delay	Attribute or Value	Candidate reason category for tracking operational delays.
Withdrawal	Attribute or Value	Candidate reason category and status value.
Incomplete Outcomes	Attribute or Value	Candidate reason category for tracking incomplete records or steps.

Unresolved Matters

Candidate	Classification	Reason
Policy or Decision	Out of scope / Implementation	Section heading, general concept covering rules and approvals.
Clarification Required	Out of scope / Implementation	Section heading highlighting open questions.
Information Required	Attribute or Value	Details needed before a request moves to a decision state *(Q1, BR01)*.
Ready for Decision	Attribute or Value	Request status stage indicating required details are complete *(Q1, BR01)*.
Eligibility	Attribute or Value	Business rules or eligibility criteria applied to determine who may submit a request *(BR02)*, criteria not agreed *(Q2)*.
Priority	Attribute or Value	Duplicate, see Priorities *(P2S5)*.
Exceptions	Conceptual Class	Duplicate, see Exceptions *(P2S5)*.
Applied	Operation or Event	Duplicate, see Applied *(P2S5)*.
Authority Required	Conceptual Class	Duplicate, see Authority *(P2S7)*.
Acts for Requester	Out of scope / Implementation	Offstage representation relationship *(SH3)*, does not interact with the system boundary.
Provisional Allocations	Conceptual Class	Duplicate, see Provisional Allocations *(P3S5)*.
Expire	Operation or Event	State transition event where a provisional allocation releases *(Q4, BR08)*.
Become Confirmed	Operation or Event	State transition event where a provisional allocation becomes confirmed *(Q4, BR08)*.
Approve Changes	Operation or Event	Authorisation event approving modifications, substitutions, or withdrawals *(Q5)*.
Substitutions	Conceptual Class	Possible change to a placement or request, not agreed *(Q5)*.
Withdrawal	Attribute or Value	Duplicate, see Withdrawal *(P6S6)*.
Versions	Conceptual Class	Domain class representing historical revisions linked to placement records *(FR03, BR06)*.
Reviews	Conceptual Class	Duplicate, see Reviews *(P4S5)*.
Outstanding Actions	Conceptual Class	Duplicate, see Outstanding Actions *(P4S1)*.
Related	Out of scope / Implementation	Association linking versions, reviews, and actions, to be modelled as a relationship *(Q6)*.
Shared	Operation or Event	Duplicate, see Shared *(P2S7)*.

Candidate	Classification	Reason
Staff	Actor	Duplicate, see Staff *(P2S4)*.
Partners	Out of scope / Implementation	Possibly the same as External Partners *(P5S2)*, offstage stakeholder *(SH6)*.
Funders	Out of scope / Implementation	Duplicate, see Funders *(P5S3)*.

Keep / Merge / Convert / Remove Decisions

Keep, Merge, Convert, and Remove Decisions

> [!NOTE] For readability, the following key is used for decisions in the tables:
>
> - 🟢 Keep
> - 🟠 Merge
> - 🟡 Convert
> - 🔴 Remove
> - 🔵 Keep Provisionally

Organisation and Current Service

Candidate	Decision	Final Term or Destination	Justification
Kerry College Placement Office	🔴 Remove	Out of Scope	Names the overarching organisation and defines the business and system boundary. Not a domain object.
Coordinates	🔴 Remove	Out of Scope	Functional verb describing business process activities rather than a domain entity.
Work-placement opportunities	🟠 Merge	Opportunity	Stakeholder wording for work-placement openings. Merged into `Opportunity` to maintain a single, agreed term.
Students	🟢 Keep	Student	Core primary actor submitting requests *(FR01)*
Programmes	🟢 Keep	Programme	Domain class holding evidence requirements and outcomes *(A5, BR01, P3S1)*. Academic records remain external *(A3)*
Opportunities	🟢 Keep	Opportunity	Core domain class representing work placement offers from employers *(P1S1, P2S2)*.
Applications	🟠 Merge	Request	Alternative term for student submissions, merged into `Request` as *(FR01, FR02, US01, UC01)* use the term request.
Employer	🟢 Keep	Employer	Primary actor offering placements and recording selection decisions *(UC06)*.
Employer decisions	🟠 Merge	Decision	Selection outcome recorded by employers merged into `Decision`, distinguished by decision type *(BR05)*
Agreements	🟢 Keep	Agreement	Confirmed placement terms and conditions maintained separately from formal legal contracts *(A1)*.
Supervisor	🔵 Keep Provisionally	Supervisor	Role assigned to a placement. Requires policy clarification to determine if the supervisor is college staff, employer, or either *(Q8)*
Supervisor allocation	🟡 Convert	Attribute of Placement	Assignment linking a supervisor to a placement, converted to an attribute of `Placement` as there is typically one supervisor per placement *(A9, Q8)*
Progress reviews	🟠 Merge	Review	Review activity, capturing new information without erasing history. Merged into `Review`

Candidate	Decision	Final Term or Destination	Justification
Recorded	🔴 Remove	Out of Scope	Functional verb indicating history preservation rules rather than a standalone concept.
Files	🔴 Remove	Out of Scope	Informal tracking mechanism used in manual processes.
Email threads	🔴 Remove	Out of Scope	Informal communication channel causing fragmented tracking.

Requests, Eligibility, and Preparation

Candidate	Decision	Final Term or Destination	Justification
Students	🔴 Remove	Student	Duplicate entry, see `Student` *(P1S1)*
Express	🔴 Remove	Out of Scope	Functional verb describing student submission behaviour.
Preferences	🟡 Convert	Attribute of `Student` / `Request`.	Student choices and personal interests. Converted to an attribute used when matching.
Provide	🔴 Remove	Out of Scope	Functional verb describing student submission actions.
Evidence	🟡 Convert	Attribute of `Request`	Documentation supplied by students, converted to an attribute tracking requirements.
Programme	🔴 Remove	Programme	Duplicate entry, see `Programme` *(P1S1)*
Opportunity	🔴 Remove	Opportunity	Duplicate entry, see `Opportunity` *(P1S1)*
Advertised	🟡 Convert	Attribute of `Opportunity`	Status value indicating opportunity visibility.
Dates	🟡 Convert	Attribute of `Opportunity` / `Placement`	Timeline associated with opportunities of placements.
Duties	🟡 Convert	Attribute of `Opportunity`	Descriptive attribute detailing opportunity responsibilities.
Approval	🔵 Keep Provisionally	Approval	Approval outcome requires clarification on whether it refers to academic approval or opportunity visibility *(P2S2, P3S2)*.
Provisional	🟡 Convert	Attribute of `Opportunity` / `Placement`	Descriptive status value indicating terms or holds.
Requests	🟢 Keep	Request	Core class representing incoming student submissions *(FR01, FR02)*.
Arrive	🔴 Remove	Out of Scope	Functional verb describing incoming request submissions.
Several Channels	🔴 Remove	Out of Scope	Current process detail, the service provides one intake route *(PR2)*.
Incomplete	🟡 Convert	Attribute of `Request` / `Placement`	Status value indicating missing details / evidence.
Staff	🟢 Keep	Staff	General internal role processing requests and managing placement activities *(SH2)*.
Distinguish	🔴 Remove	Out of Scope	Verb describing the difference between an operational change and a formal decison *(BR07)*.
Initial Expression of Interest	🟡 Convert	Attribute of `Request`	Status of a request before required evidence is supplied.
Request Awaiting Evidence	🟡 Convert	Attribute of `Request`	Request status indicating required evidence is missing.

Candidate	Decision	Final Term or Destination	Justification
Request Ready for a Decision	🟡 Convert	Attribute of `Request`	Requests status indicating required evidence is submitted *(BR01)*.
Priorities	🔵 Keep Provisionally	Priority	Priority rules when ordering requests, requires clarification on whether it is a class or an attribute *(BR02, Q2)*
Exceptions	🔵 Keep Provisionally	Exception	Approvals requiring recorded reasoning for exceptions require clarification on rule definitions *(BR02, Q2)*.
Applied	🔴 Remove	Out of Scope	Functional verb describing rule application.
Another Person or Organisation	🔴 Remove	Out of Scope	Offstage stakeholder assisting students, not directly interacting with the system boundary.
Assist	🔴 Remove	Out of Scope	Functional verb describing action.
Authority	🔵 Keep Provisionally	Authority	Rules for third parties requires clarification on required permissions *(FR05, BR03, Q3)*
Detailed Information	🟡 Convert	Attribute of `Student` / `Placement`	Information restricted by role *(CS3, NFR01)*.
Decisions	🟢 Keep	Decision	Core class capturing approval and selection outcomes across placement history *(BR06)*.
Shared	🔴 Remove	Out of Scope	Action describing information disclosure by role *(CS3)*.

Allocation and Coordination

Candidate	Decision	Final Term or Destination	Justification
Matching	🔴 Remove	Out of Scope	Core business process evaluated by the system. Evaluation logic rather than a domain class.
Considers	🔴 Remove	Out of Scope	Functional verb describing matching evaluation.
Programme Outcomes	🟡 Convert	Attribute of `Programme`	Academic learning goals used as matching criteria.
Student Interests	🟡 Convert	Attribute of `Student` / `Request`	Student choices used during matching, converted to an attribute associated with student requests.
Employer Requirements	🟡 Convert	Attribute of `Opportunity`	Criteria specified by employrs for open positions.
Location	🟡 Convert	Attribute of `Opportunity` / `Placement` / `Student`	Physical location deatail, converted to an attribute.
Capacity	🟡 Convert	Attribute of Opportunity	Calculated count of available places based on operational factors.
Potential Conflicts	🟢 Keep	Conflict	Core class for tracking overlapping placeemnt demands.
Employer Selection	🟠 Merge	Decision	Employer selection outcome, merged into the core `Decision` class, distinguished by decision type *(BR05, BR06)*
Academic Approval	🟠 Merge	Decision	College approval outcome, merged into core `Decision` class distinguished by decision type *(BR05, BR06)*
Separate Decisions	🔴 Remove	Out of Scope	Statement describing independent decision outcomes *(BR05)*
Depends on	🔴 Remove	Out of Scope	Functional verb describing capacity depenency.
People	🔴 Remove	Out of Scope	General category covering roles (Supervisor, Student, Staff), does not require another identity.

Candidate	Decision	Final Term or Destination	Justification
Places	🟡 Convert	Attribute of `Opportunity` / `Placement`	Physical location, converted to an attribute associated with placement locations.
Resources	🟡 Convert	Attribute of `Placement`	Operational facilities required to determine placement capacity.
Timing	🟡 Convert	Attribute of `Opportunity` / `Placement`	Schedule attribute, merged into date attribute associated with opportunities and placements.
Visible Vacancy	🟠 Merge	Opportunity	Stakeholder term for open placement positions, merged into `Opportunity` to maintain a single agreed term.
Satisfied	🟡 Convert	Attribute of `Match`	State condition indicating all matching requirements are fulfilled *(BR04)*.
Provisional Allocations	🟠 Merge	Placement	Capacity hold, merged into core `Placement` class *(BR08, Q4)*.
Remain	🔴 Remove	Out of Scope	Functional verb describing state duration.
Essential Information	🟡 Convert	Attribute of `Request` / `Placement`	Required details missing from an allocation.
Missing	🔴 Remove	Out of Scope	Functional verb describing missing information.
Changes	🟢 Keep	Operational Change	Core class recording revisions and adjustments to planned arrangements affecting dependency links *(FR11)*
Affect	🔴 Remove	Out of Scope	Functional verb describing knock-on effect.
Linked Arrangements	🟡 Convert	Relationship between Placements	Association / relationship between placements rather than a class.
Staff	🔴 Remove	Staff	Duplicate, see `Staff` *(P2S4)*
Preserve	🔴 Remove	Out of Scope	Verb indicating history preservation.
Current Confirmed Position	🟠 Merge	Placement	Active agreed placement, merged into core `Placement` class *(BR06)*.
Retaining Evidence	🔴 Remove	Out of Scope	Operation, history kept in `Decision` *(BR06)*
Earlier Decisions and Versions	🟠 Merge	Decision	Historical decision records, merged into `Decision` version history handling *(BR06, NFR04)*.

Progress, Review, and Exceptions

Candidate	Decision	Final Term or Destination	Justification
Staff	🔴 Remove	Staff	Duplicate, see `Staff` *(P2S4)*
Record	🔴 Remove	Out of Scope	Functional verb indicating history preservation.
Progress	🟡 Convert	Attribute of `Placement`	Descriptive tracking status and operational activity details.
Decisions	🔴 Remove	Decision	Duplicate, see `Decisions` *(P2S7)*
Outstanding Actions	🟢 Keep	Action	Core class representing follow-up tasks and todos requiring tracking and ownership *(PR7)*.

Candidate	Decision	Final Term or Destination	Justification
Notes	🔴 Remove	Out of Scope	Informal recording method targeted for replacement *(PR1)*
Messages	🔴 Remove	Out of Scope	Informal communication method targeted for replacement *(PR1)*
Spreadsheets	🔴 Remove	Out of Scope	Informal tracking method targeted for replacement *(PR1)*
Teams	🟡 Convert	Attribute of Staff	Team a staff member belongs to.
Status Terms	🟡 Convert	Attribute of `Request` / `Placement` / `Action`	Descriptive status values indicating current state.
Awaiting Action	🟡 Convert	Attribute of `Request` / `Action`	State condition indicating an outstanding task requires attention.
Responsible	🟡 Convert	Attribute of `Action` / `Placement`	Task ownership assignment.
Planned Activity	🟠 Merge	Action	Work component within a placement, merged into core `Action` class.
Changed	🟡 Convert	Attribute of `Action` / `Placement`	Status values describing state changes.
Partially Completed	🟡 Convert	Attribute of `Action` / `Placement`	Status values describing state changes.
Paused	🟡 Convert	Attribute of `Action` / `Placement`	Status values describing state changes.
Withdrawn	🟡 Convert	Attribute of `Action` / `Placement`	Status values describing state changes.
Distinguish	🔴 Remove	Out of Scope	Verb describing distinguishing the difference between operational changes and formal decisons *(BR07)*.
Operational Change	🔴 Remove	Operational Change	Duplicate, see `Changes` *(P3S6)*
Formal Decision	🟠 Merge	Decision	Recorded outcome, merged into `Decision` *(BR07)*.
Silence	🔴 Remove	Out of Scope	Business rule, silence must not be treated as approval *(BR07)*.
Approval	🔴 Remove	Approval	Duplicate, see *(P2S2)*
Reviews	🟢 Keep	Review	Core class recording review activity adding new information without erasing history *(BR06)*.
Generate	🔴 Remove	Out of Scope	Functional verb indicating creation of action items.
New Actions	🟠 Merge	Action	Tasks created as review outcomes, merged into `Action` class
Revised Arrangements	🟠 Merge	Operational Change	Updated placement conditions resulting from reviews.
Escalation	🔴 Remove	Out of Scope	Review outcome event referring a matter for further action.
Earlier Evidence	🟠 Merge	Decision	Evidence of earlier decisions and versions, merged into `Decison` version history alongside earlier decisions *(BR06, NFR04)*.
Overwritten	🔴 Remove	Out of Scope	Verb indicating deletion or overwriting.
Circumstances Change	🔴 Remove	Out of Scope	Operational event triggering updates.

Information, Reporting, and Scope

Candidate	Decision	Final Term or Destination	Justification
Coordinator	🟠 Merge	Staff	Staff role tracking unallocated requests and capacity (SH5), merged into `Staff`.
Needs	🔴 Remove	Out of Scope	Functional verb expressing stakeholder requirements.
Information	🔴 Remove	Out of Scope	Broad domain concept, too general to be a class.
Unallocated Requests	🟡 Convert	Attribute of `Request`	Status stage representing an unassigned student request.
Provisional Arrangements	🟠 Merge	Placement	Capacity, merged into core `Placement` state.
Capacity Conflicts	🟠 Merge	Conflict	Overlapping placement demands.
Overdue Actions	🟠 Merge	Action	Overdue tasks.
Incomplete Records	🟡 Convert	Attribute of `Request` / `Placement`	Status value indicating missing details.
External Partners	🔴 Remove	Out of Scope	Offstage stakeholder *(SH6)* classified as out of scope in task 2.
Receive	🔴 Remove	Out of Scope	Functional verb describing information access.
Role	🟡 Convert	Attribute of Staff	Functional position defining access *(NFR01, CS3)*.
Summary Reporting	🔴 Remove	Out of Scope	Generated from existing records.
Needed	🔴 Remove	Out of Scope	Functional verb describing stakeholder requirements.
Management	🔴 Remove	Out of Scope	Offstage stakeholder *(SH7)* does not interact directly with the system.
Funders	🔴 Remove	Out of Scope	Offstage stakeholder *(SH8)* does not interact directly with the system.
Exposing	🔴 Remove	Out of Scope	Functional verb describing disclosure.
Unnecessary	🔴 Remove	Out of Scope	Descriptive term describing redundant details.
Personal or Commercially Sensitive Information	🟡 Convert	Attribute of `Student` / `Placement`	Specific information restricted by role *(CS3, NFR01)*.
Connectivity	🔴 Remove	Out of Scope	Condition handled as a quality requirement *(NFR03, CS2)*
Unreliable	🔴 Remove	Out of Scope	Describes connection state, part of system quality *(NFR03, CS2)*
Off-site work	🔴 Remove	Out of Scope	Enviornment context affecting record updates.
Initial Scope	🔴 Remove	Out of Scope	Defines initial release deliverables.
Service Coordination	🔴 Remove	Out of Scope	Names the scope boundary, not a domain concep.

Candidate	Decision	Final Term or Destination	Justification
Records	🟢 Keep	Placement	Core placement record capturing details, decisions, and history *(FR03, P1S2)*
Specialist Professional Systems	🔴 Remove	Out of Scope	Excluded external system.
Financial Accounting	🔴 Remove	Out of Scope	Excluded external system.
Unrelated Public Website Functions	🔴 Remove	Out of Scope	Excluded external system.
Outside Scope	🔴 Remove	Out of Scope	Excluded external system.

Stakeholder Evidence

Candidate	Decision	Final Term or Destination	Justification
Coordinator	🔴 Remove	Staff	Duplicate entry, see `Coordinator` *(P5S1)*
Vacancy	🟠 Merge	Opportunity	Coordinator term for open placement positions, merged into `Opportunity` to maintain a single agreed term.
Match	🟢 Keep	Match	Core class representing successful placement pairings meeting all requirements *(BR04)*.
Important Requirements	🟡 Convert	Attribute of `Match`	Critera for a match *(BR04)*.
Satisfied	🟡 Convert	Attribute of `Match`	State condition indicating requirements are met *(BR04)*.
Service User	🟠 Merge	Student	Stakeholder term for requester, merged into `Student` *(A6)*
Need	🔴 Remove	Out of Scope	Duplicate, see Needs *(P5S1)*
Know	🔴 Remove	Out of Scope	Functional verb describing user awareness.
Waiting	🟡 Convert	Attribute of `Request` / `Placement`	Status stage representing progress or waiting condition.
Information	🔴 Remove	Out of Scope	Duplicate, see `Information` *(P5S1)*
Decision	🔴 Remove	Out of Scope	Duplicate, see `Decisions` *(P2S7)*
Outside Organisation	🔴 Remove	Out of Scope	Offstage stakeholder, does not interact with the system boundary.
Administrator	🟠 Merge	Staff	Primary actor monitoring provisional allocations *(SH9)*
Provisional Arrangements	🔴 Remove	Placement	Duplicate, see `Provisional Arrangements` *(P5S1)*
Block	🔴 Remove	Out of Scope	Verb indicating unreleased provisional allocations.
Capacity	🟡 Convert	Attribute of Opportunity	Duplicate, see Capacity *(P3S1)*
Original Request	🟠 Merge	Request	Administrator term for student submission.

Candidate	Decision	Final Term or Destination	Justification
Stalled	🟡 Convert	Attribute of `Request` / `Placement`	Status value indicating stopped progression.
Partner Representative	🔴 Remove	Out of Scope	Offstage stakeholder *(SH6)*, does not interact directly within the system boundary.
Required	🔴 Remove	Out of Scope	Functional verb describing necessity.
Role	🔴 Remove	Role	Duplicate, see `Role` *(P5S2)*.
Complete Case History	🔴 Remove	Out of Scope	Derived output generated from existing records.
Reviewer	🔴 Remove	Out of Scope	Offstage stakeholder, does not interact directly with the system boundary.
New Information	🟡 Convert	Attribute of `Review` / `Action`	Notes or details added during reviews.
Added	🔴 Remove	Out of Scope	Functional verb describing addition of notes.
Erasing	🔴 Remove	Out of Scope	Verb indicating deletion or overwriting.
Basis	🟡 Convert	Attribute of `Decision`	Reasoning supporting an earlier decision.
Earlier Decision	🟠 Merge	Decision	Reviewers term referenced during reviews, merged into `Decision` for version history.
Manager	🔴 Remove	Out of Scope	Offstage stakeholder, does not interact directly with the system boundary.
Need	🔴 Remove	Out of Scope	Duplicate, see `Needs` *(P5S1)*
Consistent Reasons	🟡 Convert	Attribute of `Action` / `Placement`	List of agreed reasons for tracking delays and widthdrawals.
Delay	🟡 Convert	Attribute of `Action` / `Placement`	Reason category for tracking operational delays.
Withdrawal	🟡 Convert	Attribute of `Action` / `Placement`	Reason category and status value.
Incomplete Outcomes	🟡 Convert	Attribute of `Action` / `Placement`	Reason category for tracking incomplete records.

Unresolved Matters

Candidate	Decision	Final Term or Destination	Justification
Policy or Decision	🔴 Remove	Out of Scope	Section heading, general concept covering rules and approvals.
Clarification Required	🔴 Remove	Out of Scope	Section heading highlighting open questions.
Information Required	🟡 Convert	Attribute of `Request`	Details needed before a request moves to a decision state *(Q1, BR01)*.
Ready for Decision	🟡 Convert	Attribute of `Request`	Request status stage indicating required details are complete *(Q1, BR01)*.

Candidate	Decision	Final Term or Destination	Justification
Eligibility	🔵 Keep Provisionally	Eligibility Rule	Business rules determining who may apply *(BR02)*. Requires clarification on rule structure *(Q2)*.
Priority	🔴 Remove	Priority	Duplicate, see `Priorities` *(P2S5)*.
Exceptions	🔴 Remove	Exception	Duplicate, see `Exceptions` *(P2S5)*
Applied	🔴 Remove	Applied	Duplicate, see `Applied` *(P2S5)*
Authority Required	🔴 Remove	Authority	Duplicate, see `Authority` *(P2S7)*
Acts for Requester	🔴 Remove	Out of Scope	Offstage relationship *(SH3)*, does not interact with the system boundary.
Provisional Allocations	🔴 Remove	Placement	Duplicate, see `Provisional Allocations` *(P3S5)*
Expire	🔴 Remove	Out of Scope	State transition event where a provisional allocation releases *(Q4, BR08)*
Become Confirmed	🔴 Remove	Out of Scope	State transition event where a provisional allocation becomes confirmed *(Q4, BR08)*
Approve Changes	🔴 Remove	Out of Scope	Authorisation approving modifications *(Q5)*
Substitutions	🔵 Keep Provisionally	Substitution	Possible change to a placement or request, requires clarification on policy handling *(Q5)*.
Withdrawal	🔴 Remove	Attribute of `Request` / `Placement`	Duplicate, see `Withdrawal` *(P6S6)*.
Versions	🟠 Merge	Decision	Historical revisions linked to placement records, merged into `Decision` version history *(FR03, BR06)*
Reviews	🔴 Remove	Review	Duplicate, see `Reviews` *(P4S5)*
Outstanding Actions	🔴 Remove	Action	Duplicate, see `Outstanding Actions` *(P4S1)*
Related	🔴 Remove	Out of Scope	Association linking versions, reviews, and actions *(Q6)*
Shared	🔴 Remove	Shared	Duplicate, see `Shared` *(P2S7)*
Staff	🔴 Remove	Staff	Duplicate, see `Staff` *(P2S4)*
Partners	🔴 Remove	Partners	Duplicate, see `External Partners` *(P5S2)*
Funders	🔴 Remove	Funders	Duplicate, see `Funders` *(P5S3)*

Evidence and Glossary

Concept	Concise Domain Definition	Related Concepts	Evidence
Student	A learner enrolled in a programme who submits placement requests and undertakes work placements.	Programme, Request, Agreement, Placement, Match	FR01, Scenario
Programme	An academic course of study that defines specific learning outcomes and evidence requirements for student placements.	Student, Opportunity, Request	A5, BR01, Scenario
Opportunity	A work-placement opening offered by an employer that details available duties, dates, and location.	Employer, Programme, Request, Placement, Conflict, Match	Scenario
Employer	An external organisation or contact offering work-placement opportunities and making selection decisions.	Opportunity, Decision, Placement, Agreement	UC06, Scenario

Concept	Concise Domain Definition	Related Concepts	Evidence
Agreement	Confirmed placement terms and conditions maintained separately from formal legal contracts.	Placement, Employer, Student	A1
Request	A student submission of placement preferences and programme evidence that moves through stages from an initial expression of interest to ready for a decision.	Student, Opportunity, Programme, Decision, match	FR01, FR02, Scenario
Staff	A member of the placement office responsible for processing student requests, coordinating placements, and managing task ownership, including coordinator and administrator roles.	Decision, Action, Review	SH2, US10
Decision	A recorded outcome capturing employer selection or academic placement approval, retaining a version history of earlier decisions.	Request, Placement, Employer, Staff, Operational Change	BR05, BR06, FR07
Conflict	An identified issue representing overlapping placement demands or capacity constraints.	Placement, Opportunity	Scenario
Operational Change	A recorded adjustment to planned arrangements that is distinct from a formal decision.	Placement, Action, Decision	FR11, Scenario, BR07
Action	A tracked task or planned activity assigned to staff for managing placement activities.	Staff, Placement, Review	PR7, Scenario
Review	A recorded progress check that captures new information without erasing history and may generate actions, revised arrangements, or escalation.	Placement, Staff, Action	Scenario, BR06
Placement	The allocation of a student to an opportunity, existing in either a provisional or confirmed state.	Student, Opportunity, Employer, Agreement, Decision, Conflict, Operational Change, Action, Review	FR03, Scenario
Match	A pairing between a student request and an opportunity where all important requirements are satisfied.	Student, Request, Opportunity	BR04, Scenario

Additional Possible Glossary Concepts

- **Supervisor:** A role assigned to a placement, which may be a college staff member or an employer contact *(Q8)*.
- **Approval:** An approval that may refer to the opportunity itself or academic approval of a placement, meaning not agreed. *(P2S2, P3S2, Q9)*.
- **Priority:** A ranking applied to order student requests during allocation and matching *(BR02, Q2)*
- **Exception:** A non-standard approval granted under specific conditions with a recorded reason *(BR02, Q2)*.
- **Authority:** A defined permission determining whether a third party may act on behalf of a student *(FR05, BR03, Q3)*
- **Eligibility Rule:** A governing condition defining the criteria a student must satisfy to submit a placement request. Requires clarification on rule structure *(BR02, Q2)*
- **Substitution:** A possible replacement within a placement or request, scope not agreed *(Q5)*.

Trace Retained Concepts to Evidence

Retained Concept	Requirement, Rule, Scenario, Phrase, or Use-Case	Why the Concept is Needed
Student	P2S1, US02 AC2	Without it, the service cannot identify who is submitting preferences or show each student their own requests (US02 AC2).
Programme	A5, BR01, P3S1	Without it, the service cannot track the evidence requirements each programme sets for requests (A5, BR01) and the outcomes used in matching (P3S1).

Retained Concept	Requirement, Rule, Scenario, Phrase, or Use-Case	Why the Concept is Needed
Opportunity	P1S1, P2S2, P3S4	Without it, the service cannot represent employer placement openings or track advertised vacancies.
Employer	UC06, P3S2	Without it, the service cannot attribute placement offerings to external hosts or record employer selection choices.
Agreement	A1	Without it, operational terms and conditions cannot be confirmed or maintained separately from formal legal contracts.
Request	FR01, FR02, US01, UC01, P2S4	Without it, staff cannot distinguish request progression stages (P2S4) or show students what their submission is waiting on (FR02, PR2).
Staff	SH2, US10	Without it, task ownership, review execution, and internal administrative responsibilities cannot be assigned to specific individuals.
Decision	BR05, BR06, FR07	Without it, the service cannot distinguish between employer selection and academic approval or keep earlier decisions (BR06).
Conflict	P3S1, P5S1	Without it, potential capacity conflicts and overlapping demands cannot be flagged for the coordinator (P5S1).
Operational Change	FR11, P3S6, BR07	Without it, changes to planned arrangements could not be recorded separately from formal decisions (BR07), or their effect on linked arrangements shown (FR11).
Placement	FR03, P1S2, P3S5, BR08	Without it, the service cannot maintain a single shared record across both provisional allocations and confirmed arrangements (BR08).
Action	P4S2, P4S3, P4S5, P5S1, PR7	Without it, follow-up tasks and planned activities created during reviews cannot be assigned, monitored, or flagged when overdue.
Review	P1S2, P4S5, BR06	Without it, progress checks cannot be captured without erasing earlier information (BR06).
Match	BR04, P6S1	Without it, the service cannot evaluate whether all important requirements are satisfied, though it remains under clarification whether it is a stored object or derived state (Q10).

- Multiplicity
- Domain Model Diagram

Conceptual Classes

Student: Preferences, Student Interests, Location, Detailed Information, Personal or Commercially Sensitive Information

Programme: Programme Outcomes

Opportunity: Advertised, Dates, Timing, Duties, Provisional, Employer Requirements, Location, Places, Capacity

Employer: *(none)*

Agreement: *(none)*

Request: Preferences, Student Interests, Evidence, Incomplete, Initial Expression of Interest, Request Awaiting Evidence, Request Ready for a Decision, Essential Information, Status Terms, Awaiting Action, Unallocated Requests, Incomplete Records, Waiting, Stalled, Information Required, Ready for Decision

Staff: Teams, Role

Decision: Basis

Conflict: *(none)*

Operational Change: *(none)*

Placement: Supervisor Allocation, Dates, Timing, Provisional, Location, Places, Resources, Progress, Incomplete, Essential Information, Incomplete Records, Detailed Information, Personal or Commercially Sensitive Information, Status Terms, Responsible, Changed, Partially Completed, Paused, Withdrawn, Waiting, Stalled, Consistent Reasons, Delay, Withdrawal, Incomplete Outcomes

Action: Status Terms, Awaiting Action, Responsible, Changed, Partially Completed, Paused, Withdrawn, New Information, Consistent Reasons, Delay, Withdrawal, Incomplete Outcomes

Review: New Information

Match: Important Requirements, Satisfied

Relationship between Placements: Linked Arrangements *(association, Session 6)*

Selected Attributes

> [!NOTE] I based this off Part A in the lab sheet and added in the attributes above along with any possible attributes I believe will be required within the domain model.
>
> For readability, the following key is used for decisions in the tables:
>
> - 🟢 Keep
> - 🔴 Remove
> - 🔵 Keep Provisionally

Concept	Candidate Attributes	Keep / Remove	Reason
Student	studentNumber *(added)*	🟢 Keep	Identifies the student so a request can be recorded against them *(US01)* and they see only their own requests *(US02)*.
	name *(added)*	🟢 Keep	Simple identifying value used across the shared record *(FR03)*.
	Location	🟢 Keep	The student's location is one of the matching considerations *(P3S1, BR04)*.
	Preferences	🔴 Remove	Moved to `Request`. Preferences are submitted with each request *(FR01, US01)* and may differ between requests.
	Student Interests	🔴 Remove	Moved to `Request` for the same reason as Preferences *(P3S1)*.
	Detailed Information	🔴 Remove	A classification of data for access control, not a single value. Handled as a constraint *(NFR01, NFR02, CS3)*.
	Personal or Commercially Sensitive Information	🔴 Remove	A data-sensitivity category, not an attribute. Handled by *(NFR01, CS3, A4)*.
Programme	programmeCode, title *(added)*	🟢 Keep	Identify which programme a student is enrolled on, so the right evidence requirements are applied to their request *(P2S1, A5)*.
	Programme Outcomes	🟢 Keep	Used as a matching consideration *(P3S1, BR04)*.
	evidenceRequirements *(added)*	🟢 Keep	Each programme sets its own evidence requirements *(A5)*. Needed to decide when a request is ready for a decision *(BR01)*.
Opportunity	title *(added)*	🟢 Keep	Lets a student identify the opportunity they are requesting *(US01)* and the coordinator identify each provisional or confirmed opportunity *(US09)*.
	status *(added)*	🟢 Keep	One value from an agreed set (advertised, provisional, confirmed, closed). An opportunity may be advertised while details are still provisional *(P2S2)*, and only confirmed opportunities count as available capacity *(US09, FR09)*.
	Dates	🟢 Keep	Kept as `startDate` and `endDate`. Dates may still be provisional *(P2S2)*.
	Duties	🟢 Keep	Describes the opening and may be provisional *(P2S2)*. Employer confirms duties *(SH4)*.
	Provisional	🟢 Keep	Kept as a `status` value **and** as `provisionalDetails`, because the coordinator must see *which* details (dates, duties, approval) are still provisional *(P2S2, US09)*.

Concept	Candidate Attributes	Keep / Remove	Reason
	Employer Requirements	🟢 Keep	Matching consideration set by the employer *(P3S1, BR04)*.
	Location	🟢 Keep	Matching consideration *(P3S1, BR04)*.
	Capacity	🟢 Keep	Number of places offered. Only confirmed capacity counts as available *(US09, FR09)*. Capacity depends on people, places, resources and timing *(P3S3)*, but how it is calculated is not agreed, so only the resulting number is held here (see Open Questions).
	Advertised	🔴 Remove	Becomes a value of `status` (advertised, provisional, confirmed, closed) rather than a separate yes/no attribute *(P2S2)*.
	Timing	🔴 Remove	Duplicates Dates, as already noted in Finding the Objects.
	Places	🔴 Remove	Duplicates Location (where) and Capacity (how many).
Employer	organisationName *(added)*	🟢 Keep	Identifies who offers the opportunity and makes selection decisions.
	contactName *(added)*	🟢 Keep	The employer is described as an organisation or contact in the glossary.
Agreement	agreedDate *(added)*	🟢 Keep	Records when placement terms were confirmed *(A1)*.
	terms *(added)*	🟢 Keep	The confirmed placement terms. Legal contract negotiation stays outside the system *(A1, OS4)*.
	status	🔴 Remove	No evidence of agreement states. An Agreement by definition records confirmed terms *(A1)*. If terms are revised, the change is recorded as an `OperationalChange` *(BR07)*.
Request	submittedDate *(added)*	🟢 Keep	Needed to see when a request arrived and whether it has stalled *(P6S3, BR08)*.
	priorityRuleApplied *(added)*	🔵 Keep Provisionally	The priority rule applied must be recorded *(US04)*, but the rules are not agreed *(Q2)*.
	Preferences	🟢 Keep	Submitted by the student *(FR01, US01)*.
	Student Interests	🟢 Keep	Kept as `interests`, a matching consideration *(P3S1)*.
	Evidence	🟢 Keep	Programme evidence supplied with the request *(FR01, US01, BR01)*.
	Status Terms	🟢 Keep	Kept as one `status` attribute drawn from the agreed set *(FR02, US02)*.
	Waiting	🟢 Keep	Kept as `waitingOn` (information, decision, or outside organisation). This is separate from `status` because the student needs to know *what* they are waiting on *(FR02, US02, P6S2)*.
	Initial Expression of Interest	🔴 Remove	A value of `status` *(P2S4)*.
	Request Awaiting Evidence	🔴 Remove	A value of `status` *(P2S4)*.
	Request Ready for a Decision	🔴 Remove	A value of `status` *(P2S4, BR01)*.
	Ready for Decision	🔴 Remove	Duplicate of the above, a value of `status`.
	Incomplete	🔴 Remove	Same meaning as *awaiting evidence*, a value of `status`
	Incomplete Records	🔴 Remove	Same as Incomplete.
	Unallocated Requests	🔴 Remove	A value of `status` *(P5S1)*.
	Stalled	🔴 Remove	A value of `status` *(P6S3)*.
	Awaiting Action	🔴 Remove	Belongs to `Action`, which has a responsible staff member and due date *(US10, P5S1)*.
	Essential Information	🔴 Remove	A broad category, covered by `evidence` and `status`.

Concept	Candidate Attributes	Keep / Remove	Reason
	Information Required	🔴 Remove	Derived from the student's `Programme evidenceRequirements` *(BR01, Q1)*.
Staff	staffNumber, name *(added)*	🟢 Keep	Identify the person responsible for an action *(US10)* and who recorded a decision *(FR07)*.
	Role	🟢 Keep	Distinguishes placement staff, coordinator and administrator, which were merged into `Staff` *(SH2, SH5, SH9)*. Also drives what information a person may see *(NFR01)*.
	Teams	🔴 Remove	*P4S2* describes the problem (teams use status terms differently). The fix is one agreed status set *(FR10, PR7)*, not recording each person's team. No requirement needs a team value.
Decision	decisionType *(added)*	🟢 Keep	Distinguishes employer selection from academic approval, as decided when merging them into `Decision` *(BR05)*.
	outcome *(added)*	🟢 Keep	e.g. selected / not selected, approved / refused *(US07)*.
	decisionDate *(added)*	🟢 Keep	Needed to keep the order of earlier and current decisions *(BR06)*.
	Basis	🟢 Keep	The reasons behind a decision must not be erased *(P6S5, BR06, NFR04)*.
Conflict	conflictType *(added)*	🟢 Keep	Capacity, timing, location or resource conflict *(P3S1, P3S3, P5S1)*.
	description, identifiedDate *(added)*	🟢 Keep	Lets the coordinator see what the conflict is and how long it has been open *(P5S1)*.
	status *(added)*	🟢 Keep	Open or resolved, so the coordinator can see which conflicts still need attention *(P5S1)* and resolve them *(SH5)*.
Operational Change	changeDate *(added)*	🟢 Keep	When the arrangement changed *(P3S6)*.
	description *(added)*	🟢 Keep	What changed. Kept separate from a formal decision *(BR07)*.
	reason *(added)*	🟢 Keep	Why the change was made, so earlier arrangements keep their context *(BR06)*.
Placement	allocationDate *(added)*	🟢 Keep	Needed to tell when a provisional allocation has stalled *(BR08, Q4)*.
	Dates	🟢 Keep	Kept as `startDate` and `endDate`. A placement's dates may differ from the advertised dates.
	Status Terms	🟢 Keep	Kept as one `status` attribute from the agreed set *(FR10)*.
	Consistent Reasons	🟢 Keep	Kept as `statusReason`, chosen from an agreed list *(P6S6)*.
	Supervisor Allocation	🔵 Keep Provisionally	Kept as `supervisor` while Q8 is open. A supervisor has identity, so it should become a `Supervisor` class with an association once Q8 is answered *(A9, Q8)*.
	Timing	🔴 Remove	Duplicates Dates.
	Provisional	🔴 Remove	A value of `status` *(P3S5, BR08)*.
	Location	🔴 Remove	Duplicates the opportunity's location, reached through the request.
	Places	🔴 Remove	Duplicates Location and Opportunity capacity.
	Resources	🔴 Remove	Resources affect capacity *(P3S3)*, and capacity belongs to `Opportunity`, not `Placement`. How people, places, resources and timing combine into capacity is not agreed, so it is not modelled yet (see Open Questions).
	Progress	🔴 Remove	Progress has history and is recorded through `Review` *(P1S2, P4S5)*. A single attribute would overwrite earlier progress *(BR06)*.
	Incomplete	🔴 Remove	A value of `status`.

Concept	Candidate Attributes	Keep / Remove	Reason
	Essential Information	🔴 Remove	A broad category, covered by `status` being incomplete.
	Incomplete Records	🔴 Remove	Same as Incomplete.
	Detailed Information	🔴 Remove	Access-control category *(NFR01, CS3)*.
	Personal or Commercially Sensitive Information	🔴 Remove	Access-control category *(NFR01, CS3, A4)*.
	Responsible	🔴 Remove	Responsibility belongs to a person. It is shown through `Action` → `Staff` *(US03, US10)*.
	Changed	🔴 Remove	*P4S3* says a *planned activity* may be changed, so as a status it belongs to `Action`. A change to the placement's **arrangements** is recorded as an `OperationalChange`, which keeps what changed and why *(P3S6, BR07)*.
	Partially Completed	🔴 Remove	Describes a planned activity, so it belongs to `Action` *(P4S3)*.
	Paused	🔴 Remove	Describes a planned activity, so it belongs to `Action` *(P4S3)*.
	Withdrawn	🔴 Remove	A value of `status` *(P4S3, Q5)*.
	Waiting	🔴 Remove	A value of `status`.
	Stalled	🔴 Remove	A value of `status` *(P6S3, BR08)*.
	Delay	🔴 Remove	A value of `statusReason` *(P6S6)*.
	Withdrawal	🔴 Remove	A value of `statusReason` *(P6S6)*.
	Incomplete Outcomes	🔴 Remove	A value of `statusReason` *(P6S6)*.
Action	description, dueDate *(added)*	🟢 Keep	The coordinator needs to see overdue actions, which needs a due date *(P5S1)*.
	Status Terms	🟢 Keep	Kept as `status` from the agreed set *(FR10, US10)*.
	Consistent Reasons	🟢 Keep	Kept as `statusReason` from an agreed list *(P6S6)*.
	statusChangedDate *(added)*	🟢 Keep	A status change records the date *(US10)*.
	Awaiting Action	🔴 Remove	A value of `status` *(P4S2)*.
	Responsible	🔴 Remove	Replaced by the association `Staff` *is responsible for* `Action` *(US10 AC2)*.
	Changed	🔴 Remove	A value of `status`. *P4S3* lists changed alongside partially completed, paused and withdrawn as states of a planned activity, so it is treated the same way as those.
	Partially Completed	🔴 Remove	A value of `status` *(P4S3)*.
	Paused	🔴 Remove	A value of `status` *(P4S3)*.
	Withdrawn	🔴 Remove	A value of `status` *(P4S3)*.
	New Information	🔴 Remove	Belongs to `Review` *(P6S5)*.
	Delay	🔴 Remove	A value of `statusReason`.
	Withdrawal	🔴 Remove	A value of `statusReason`.
	Incomplete Outcomes	🔴 Remove	A value of `statusReason`.
Review	reviewDate *(added)*	🟢 Keep	Keeps the order of reviews so earlier information is not lost *(BR06)*.
	New Information	🟢 Keep	Information added at a review without erasing earlier information *(P6S5)*.
	outcome *(added)*	🟢 Keep	No further action, new actions, revised arrangements, or escalation *(P4S5)*.

Concept	Candidate Attributes	Keep / Remove	Reason
Match	Important Requirements	🔴 Remove	Match is not modelled as a class until Q10 is answered. The requirements are already attributes of `Programme`, `Opportunity` and `Request`, and BR04 becomes a constraint.
	Satisfied	🔴 Remove	A derived condition (true when every important requirement is met), not a stored value.

Named Associations

> [!NOTE] Each candidate was checked against the tests:
>
> - Must the relationship be remembered beyond one temporary calculation?
> - Do stakeholders discuss, query, or report on the relationship?
> - Does it support a business rule or use case?
> - Can the assocation name be read as a simple domain sentence?
> - Does the assocation duplicate another path without adding value?
>
> **Classes**: Student · Programme · Opportunity · Employer · Agreement · Request · Staff · Decision · Conflict · Operational Change · Placement · Action · Review · Match
>
> Candidates were drawn from the following sources: the related concepts column from the glossary in finding the objects, scenario sentences linking concepts, and task 1 attributes removed due to pointing to another concept.

Concept	Related Concepts
Student	Programme, Request, Agreement, Placement, Match
Programme	Student, Opportunity, Request
Opportunity	Employer, Programme, Request, Placement, Conflict, Match
Employer	Opportunity, Decision, Placement, Agreement
Agreement	Placement, Employer, Student
Request	Student, Opportunity, Programme, Decision, Match
Staff	Decision, Action, Review
Decision	Request, Placement, Employer, Staff, Operational Change
Conflict	Placement, Opportunity
Operational Change	Placement, Action, Decision
Action	Staff, Placement, Review
Review	Placement, Staff, Action
Placement	Student, Opportunity, Employer, Agreement, Decision, Conflict, Operational Change, Action, Review
Match	Student, Request, Opportunity

Class A	Association Name or Sentence	Class B	Evidence	Keep?
Student	is enrolled on	Programme	Students provide evidence *required by their programme (P2S1, A5, BR01)*	Yes
	submits	Request	*(FR01, US01 AC4)* the request is recorded against the student. *(US02 AC2)* students see only their own requests	Yes
	is party to	Agreement	Glossary: Student related to Agreement	No. Agreements are recorded per placement *(A1)*, so the student is

Class A	Association Name or Sentence	Class B	Evidence	Keep?
				reached through Agreement → Placement → Request → Student
	is allocated to	Placement	Glossary: Student related to Placement	No. Duplicates Student → Request → Placement and loses the link to the request that started it
	is matched in	Match	Glossary: Student related to Match	Deferred. Depends on whether a match is its own record *(Q10)*. Even then, the student would be reached through the request
Programme	is suitable for	Opportunity	Glossary: Programme related to Opportunity	No. No rule says an opportunity is restricted to a programme. Programme outcomes are compared during matching instead *(BR04)*
	sets evidence requirements for	Request	*(BR01, A5)* a request needs the evidence its programme requires	No. Duplicates Request → Student → Programme. The requirement comes from the student's own programme *(P2S1)*, and BR01 is kept as a constraint
Opportunity	is offered by	Employer	*(US06 AC1)* the employer is offering the opportunity. Glossary: opening offered by an employer	Yes
	receives	Request	*(US01 AC1)* the requested opportunity is open for requests. *(US06)* a student has applied for that placement	Yes
	is filled by	Placement	Capacity is counted per opportunity *(FR09)*	No. Duplicates Placement → Request → Opportunity. Every placement has exactly one request, so the path is always available
	is involved in	Conflict	Capacity conflicts *(P5S1)*	No. Conflicts are recorded against the placements that compete *(Conflict involves Placement)*, and the opportunity is reached through them. Revisit if a conflict can exist before any placement
	is matched in	Match	*(BR04, P6S1)*	Deferred. Depends on whether a match is its own record *(Q10)*
Employer	makes	Decision	*(FR06, US06)* employers record selection decisions	Yes
	hosts	Placement	Glossary: Employer related to Placement	No. Duplicates Placement → Request → Opportunity → Employer
	signs	Agreement	Glossary: Employer related to Agreement	No. Reached through Agreement → Placement → Request → Opportunity → Employer, and legal contracts are out of scope *(OS4)*
Agreement	governs	Placement	Agreements are recorded per placement *(P1S2, A1, US03 AC3)*	Yes
Request	receives	Decision	*(US06 AC3)* selection recorded against the application	No. Kept on Placement instead, because BR05 and US06's Given-When-Then talk about whether the *placement* can proceed. The request is reachable from the placement

Class A	Association Name or Sentence	Class B	Evidence	Keep?
	is matched in	Match	*(BR04, P6S1)*	Deferred. Depends on whether a match is its own record *(Q10)*
	results in	Placement *(added)*	A placement is the allocation of a student to an opportunity *(glossary)*, starting as a provisional allocation from a request *(P3S5, P6S3 "the original request")*	Yes
	requires	Action *(added)*	The coordinator needs overdue actions and unallocated requests *(P5S1)*. A request awaiting evidence or a decision needs follow-ups (chase evidence, decide) before any placement exists *(P2S4, US02 AC4)*	Yes
Staff	records	Decision	*(FR07, US07)* staff record academic approval	Yes
	is responsible for	Action	*(US10 AC2)* each activity shows the person responsible for the next action *(P4S2, PR7)*	Yes
	conducts	Review	Reviews are carried out by someone	No. No requirement asks who conducted a review. The reviewer is an offstage stakeholder *(SH10)*
	supervises	Placement *(added)*	*(A9)* supervisor allocation	Deferred. Depends on whether a supervisor is college staff, an employer contact, or either *(Q8)*
Decision	concerns	Placement	Employer selection and academic approval are both needed before a placement proceeds *(BR05, US06 AC4, US07 AC1)*	Yes
	is distinguished from	Operational Change	*(BR07)* a formal decision must be distinguished from an operational change	No. BR07 keeps the two apart. It does not say one causes or records the other. Revisit if changes need an approving decision *(Q5)*
	supersedes	Decision *(added)*	Earlier decisions and versions are kept, not overwritten *(P3S7, BR06, NFR04)*	Yes
Conflict	involves	Placement	Matching considers potential conflicts. The coordinator needs to see capacity conflicts *(P3S1, P5S1)*	Yes
Operational Change	applies to	Placement	Changes to arrangements must be recorded separately from decisions *(P3S6, P4S4, BR07, FR11)*	Yes
	leads to	Action	After a change, affected linked arrangements are marked for review *(US11 AC3)*	No. Follow-up actions are recorded against the affected placement, and no requirement asks which change caused an action. How changes and actions relate is open *(Q6)*
Action	belongs to	Placement	Outstanding actions and planned activities belong to a placement *(P4S1, P4S3, US03 AC4)*	Yes
	is generated by	Review	Reviews may generate new actions *(P4S5)*	Yes

Class A	Association Name or Sentence	Class B	Evidence	Keep?
Review	reviews	Placement	Progress reviews are recorded per placement *(P1S2, US03 AC3)*	Yes
	leads to	Operational Change *(added)*	Reviews may generate revised arrangements *(P4S5)*. Session 5 merged Revised Arrangements into Operational Change	Yes
Placement	is linked to	Placement *(added)*	Linked arrangements *(P3S6, FR11, US11 AC1)*. Planned as an association in Session 5	Yes

Multiplicity

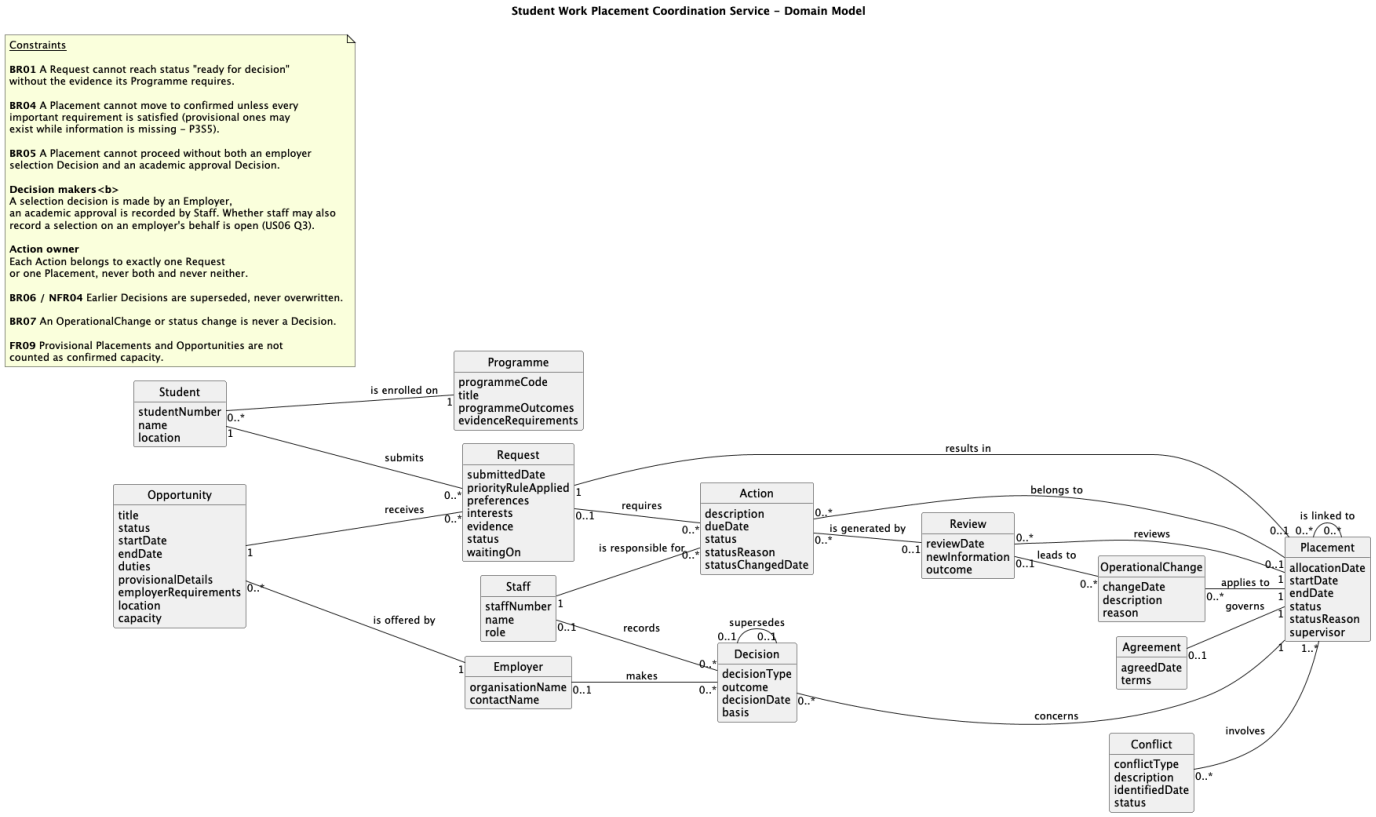

`ClassA "x" -- "y" ClassB`: the value x beside Class A is read from the point of view of one Class B instance. The value y beside Class B is read from the point of view of one Class A instance.

Association	Multiplicity at Class A	Multiplicity at Class B	Reading from Both Ends	Evidence / Rule
Student *is enrolled on* Programme	0..*	1	Each Student is enrolled on exactly one Programme. A Programme has zero or many Students.	Evidence is *required by their programme (P2S1, A5)*. Academic records are kept elsewhere *(A3)*, so only the current programme is held.
Student *submits* Request	1	0..*	Each Request is submitted by exactly one Student. A Student submits zero or many Requests.	*(FR01, US01 AC4, US02 AC2)*. A student can hold several requests over time.
Opportunity *is offered by* Employer	0..*	1	Each Opportunity is offered by exactly one Employer. An Employer offers zero or many Opportunities.	*(US06 AC1)*
Opportunity *receives* Request	1	0..*	Each Request is for exactly one Opportunity. An Opportunity receives zero or many Requests.	*(US01 AC1)* "the requested placement opportunity".
Employer *makes* Decision	0..1	0..*	Each Decision is made by zero or one Employer. An Employer makes zero or many Decisions.	Only selection decisions have an employer *(FR06)*. Academic approvals have none.
Agreement *governs* Placement	0..1	1	Each Agreement governs exactly one Placement. A Placement is governed by zero or one Agreement.	Zero while provisional. Agreements record confirmed terms *(A1)*.
Request *results in* Placement	1	0..1	Each Placement comes from exactly one Request. A Request results in zero or one Placement.	Zero while a request is still an expression of interest or awaiting evidence *(P2S4)*. A released or withdrawn placement keeps its status, so it is not replaced *(BR06)*.
Request *requires* Action	0..1	0..*	Each Action belongs to zero or one Request. A Request requires zero or many Actions.	*(P5S1, P2S4)*. Zero because placement-stage actions belong to the placement. Each Action belongs to exactly one Request **or** one Placement.

Association	Multiplicity at Class A	Multiplicity at Class B	Reading from Both Ends	Evidence / Rule
Staff *records* Decision	0..1	0..*	Each Decision is recorded by zero or one Staff member. A Staff member records zero or many Decisions.	Academic approvals are recorded by staff *(FR07)*. Whether staff also record selections on an employer's behalf is open *(US06 Q3)*.
Staff *is responsible for* Action	1	0..*	Each Action has exactly one responsible Staff member. A Staff member is responsible for zero or many Actions.	*(US10 AC2)* "the person responsible". Exactly one, so ownership is never unclear *(PR7)*.
Decision *concerns* Placement	0..*	1	Each Decision concerns exactly one Placement. A Placement is the subject of zero or many Decisions.	Zero before any decision. At least one selection and one approval before proceeding *(BR05)*, plus earlier versions *(BR06)*. "Silence is not approval" *(BR07)*, so zero must be allowed.
Decision *supersedes* Decision	0..1	0..1	A Decision is superseded by zero or one later Decision. A Decision supersedes zero or one earlier Decision.	Keeps a chain of versions instead of overwriting *(BR06, NFR04)*.
Conflict *involves* Placement	0..*	1..*	Each Conflict involves one or more Placements. A Placement is involved in zero or many Conflicts.	*(P3S1, P5S1)*. "1.." *rather than* "2..", because a conflict may be between one placement and a resource or timing limit *(P3S3)*.
OperationalChange *applies to* Placement	0..*	1	Each OperationalChange applies to exactly one Placement. A Placement has zero or many OperationalChanges.	*(P3S6, P4S3, BR07)*
Action *belongs to* Placement	0..*	0..1	Each Action belongs to zero or one Placement. A Placement has zero or many Actions.	*(P4S1, US03 AC4)*. Zero because a request-stage action has no placement yet.
Action *is generated by* Review	0..*	0..1	Each Action is generated by zero or one Review. A Review generates zero or many Actions.	Zero because actions can also be planned without a review *(P4S3)*.
Review *reviews* Placement	0..*	1	Each Review is of exactly one Placement. A Placement is reviewed in zero or many Reviews.	*(P1S2, P4S5)*
Review *leads to* OperationalChange	0..1	0..*	Each OperationalChange comes from zero or one Review. A Review leads to zero or many OperationalChanges.	Revised arrangements from reviews *(P4S5)*. Changes can also happen outside a review *(P3S6)*.
Placement *is linked to* Placement	0..*	0..*	A Placement may be linked to zero or many other Placements, in both directions.	*(US11 AC1, AC4)* an arrangement may have none. What links them is open *(US11 Q1)*.

REFLECTION AND AI DECLARATION

- REFLECTION AND AI DECLARATION
- Decisions
  - Stakeholders and Requirements
  - Finding the Objects
  - Domain Modelling
- Revisions
  - Stakeholder Expected Interactions
  - Supervisor
- Limitations
- AI Disclosure
  - Project Referencing Linking
  - Example of a Suggestion I Modified.

As the analysis was developed by following the weekly labs, decisions and revisons were recorded within each section where they were made, rather than in a separate decision log.

Decisions

Stakeholders and Requirements

I made the decision to add a `Data Protection Officer` even though the scenario never names one. This was an assumption I made *(A8)*. The scenario raises sharing concerns that no listed stakeholder owns, therefore I inferred the role and made it an offstage stakeholder *(P2S7, P5S2, P5S3)*.

I felt this was necessary to do as this role gives *(NFR01, NFR02, BR03)* an owner, and gives *(Q7)* someone to direct the question to.

Finding the Objects

I made a decision to merge `Placement Staff`, `Coordinator` and `Administrator` into a single `Staff` class with a `role` attribute, even though they are separate actors in the use case model. I made this decision as separate goals make them separate actors, while the same information makes them one class.

Domain Modelling

I also created a `waitingOn` attribute, separate from `status`. I created the attribute as the student needs to know what they are waiting on, not just the current status *(P6S2)*.

Revisions

Stakeholder Expected Interactions

While completing the `Stakeholders and Requirements` section of this project, I recorded 'expected interactions' for every stakeholder. After the actor analysis, I made five of these stakeholders offstage *(third party rep, external partners, management, funders, and reviewer)*. This was due to no user story having them use the service directly, but their interests still being protected through the `Non-Functional Requirements` and the `Business Rules`.

Supervisor

Initially, `Supervisor` was kept provisionally as a possible concept. I justified this by stating it would need policy clarification to determine if the supervisor is a staff member in the college, an employer contact, or either *(Q8)*.

In the domain modelling process, it was kept as a provisional attribute on Placement. This is due to the supervisor having an identity, which would ordinarily make it a class. However, *(Q8)* decides which association it needs. In this instance, I decided to leave the question visible rather than guess.

Limitations

This analysis has clear boundaries. Several requirements still depend on unresolved questions. Additionally, only a single use case *(UC01)* has been fully detailed alongside its Gherkin scenarios, meaning the remaining use cases remain high level.

AI Disclosure

For this project, I use Claude (Anthropic) to assist me.

For all of my usage including prompts and responses please see: `references/AI-Usage`

Project Referencing Linking

Additionally, I want to be forthcoming in my usage of AI to assist me in associated statements I wrote with earlier evidence. This can be seen throughout the entire project with the references beside statements or justifications e.g. *(FR01)*. These statements were written by me, with a lot of the referencing links being assisted with Claude.

The reason I did this was due to a considerably large body of earlier evidence I would have had to otherwise review to extract any references to confirm my statements. Due to time constraints and other projects, I decided this the best course of action as it allowed me to trace statements to evidence that would otherwise have taken considerably longer to locate.

For this project, I pasted the entirety of my files into Claude. I subsequently would write the tables and content, and would utilise AI to assist me in referencing and linking content in these files.

This ensured I had the evidence to back up my statements and ensured any statements, such as assumptions, were marked as such and were not taken as fact.

Example of a Suggestion I Modified.

Source: Finding the Objects: Grouping Converted Words

This was an example of an AI suggestion that I checked before applying.

Claude suggested that many of the converted terms were status values rather than separate attributes.

I checked this against the scenario while building the domain model, and made the following decison:

- Collapsed these terms into a single `status` attribute on `Request`, `Placement`, and `Action`, with `statusReason` on `Placement`, and `Action` for the agreed delay, withdrawal, and incomplete outcome reasons.
